Upcoming Releases

- Operator Initiated Commitments (New Feed)
- Historic Data Retrieval
  - To enhance the performance of querying current data to users; Volume of five minute real-time LMP data
  - Target implementation in January 2020
  - Historic Data definition will be on a per feed basis due to varying volume of data per feed
  - The solution will be applied for the following feeds only. Remaining feeds will remain as is at the current time.
    - Real-Time Five Minute LMPs
    - Real-Time Hourly LMPs
    - Day-Ahead Hourly LMPs
  - Archived data model will be available in train environment in November 2019 for testing purposes.
- Edatafeed migration to Data Miner 2
  - Incorporate eDataFeed data streams into Data Miner 2 in 2020.
  - Retire eDataFeed in 2021 (1 year from go-live in Data Miner 2)
Historic Data Retrieval

• Historic data will be available via UI and API as it is today
• The data structure, format and layout will remain unchanged
• Historic data start and end dates will be rolling dates and not calendar dates
• Historic data will have limited querying capabilities
• API request and response structure, format and field definitions will not change
• Appropriate error messages will be returned to users if UI and/or API query contains a filter that is not available for historic data
• More details will be updated on tech change community as the solution goes through the development cycle
Data Miner 2 Support

- View API details in the **API Guide**
- Contact Data Miner 2 Support @ **DataMiner2Support@pjm.com**
- Subscribe to the Data Miner 2 Notification List on PJM.com **My Email Lists**
  - Notifications for all releases, enhancements, and data issues & resolutions
- Visit [Tech Change Community](#) page for Knowledge base on Support issues
Product Details
Data Miner 2 is the central data repository and interface for PJM public data.

Key Product Features
- Unified / highly available interface for all PJM public data
- APIs available for system to system integrations
- Metadata available
- Large Data Export feature available. Download limits are as follows: UI – Up to One Million Rows. API – Up to 50K Rows per fetch
