

Spotlight Power

Spotlight Power provides energy management and optimization services across North America, focused on delivering tailored, uniquely structured solutions for our generation and load clients.

Spotlight Power was founded on the thesis of being strategic partners with our clients, serving as their extension to the market, navigating the ever-changing market dynamics, to ensure the effective and profitable management of their portfolios.

Our team of dedicated energy professionals with an average of 18 years of energy optimization, commodity trading and risk management experience, has combined these capabilities with that of Spotlight Energy, well-established since 2015, providing natural gas across North America, serving producers, marketers, and large end use customers.

The result, core to our fundamental mission of delivering best in class energy optimization services built on trust and a tireless work ethic, is a platform our clients can count on to solve their challenges.
