

# Use Case Next Steps Discussion

Madalyn Beban  
Market Design Specialist

DIRS  
February 25, 2022

- So far we've used Use Cases to explore different aspects of the DERA Proposal and its implications
- **What purpose can Use Cases provide in the implementation phase?**
- UCs have been covered at 8 prior meetings

- Soliciting feedback from stakeholders
  - What was useful? What was not?
  - Should we continue?
- Potential next steps
  - Review market participation and valuation for all use cases
  - Speak to more specific technology cases (including batteries, EVs, and hybrids)

- EPRI has explored use cases as a way to understand market wants, needs, and the bounds of existing proposed implementations
- Created a survey tool to “collect the use cases and aggregate the information and share back with the industry at regular updates.”
- Survey tool used to collect use cases<sup>\*\*</sup>:  
<https://www.epri.com/research/programs/027560/results/3002022890>
- **Public is able to add their own use cases to the database**

<sup>\*\*</sup> The tool is an “.exe” file so please ensure compliance with your organization’s IT and firewall procedures.
