

DER Subcommittee - Update

Scott Baker, Chair
Applied Innovation
Market Services
Scott.Baker@pjm.com

Market participation models for DER located behind a customer's load meter, or able to directly serve retail load during a grid outage.

- Generation
- Demand side resource
- Combination of Gen/DR → Proposal to clarify @ MRC
- New resource type (W-DER) → Straw proposal pending

Wholesale DER Interconnection assessment, especially WMPA resources and ‘very small’ DER.

- Lots of education
- Solutions matrix under development

Primary Frequency Response (or other physical/operational interconnection requirements) for WMPA* resources.

- Jurisdictional issue – PJM does not have jurisdiction over physical interconnection requirements for WMPA resources
- Education and open discussion phase
- Work plan to be determined
- **Distribution system reliability and safety critical to this issue – coordination with EDCs necessary**

*WMPA = Wholesale Market Participation Agreement,
Issued to non-FERC jurisdictional interconnection customers

- Next meeting January 14, 2019
