Offshore Wind Development and Merchant Transmission – Phase I Update

Suzanne Glatz
Director, Infrastructure Planning
March 13, 2019
• PJM has received requests for interconnection of a radial non-controllable AC transmission lines without defined generation and have requested to receive interconnection rights

• Under PJM’s current process rules, such requests are not eligible for rights

• At the February 2019 PC meeting, members endorsed a problem statement to explore options for studying such interconnections to eligible for rights
Problem Statement Proposed Approach

Phase 1

• Consider process change to allow Interconnection Customers to request Capacity Interconnection Rights for a radial line and identify impacts and required network upgrades

Phase 2

• Consider process changes to allow flexibility for Interconnection Customers to connect the transmission facilities together for an “ocean grid”
Completed

• Problem Statement and Issue Charge endorsed at the PC in February 2019

Phase 1 Planned Activities

• Education on current process – April 2019
• Explore options – May through July 2019
• Seek PC endorsement Phase 1 changes – August 2019 PC
PC Special Sessions Scheduled

Merchant Transmission and Offshore Wind Development – Phase 1

- **4/16/2019**
  1:00 - 4:00 pm

- **5/3/2019**
  1:00 - 4:00 pm

- **5/31/2019**
  1:00 - 4:00 pm

- **6/28/2019**
  1:00 - 4:00 pm

- **7/24/2019**
  1:00 - 4:00 pm
