

Potential MSRS report for 5 Minute Real-Time Transactions

- Real-time Daily Transactions report displays hourly transaction MW data
- Import and Export transactions can potentially be updated to change MW value every 15 minutes, and PJM calculates real-time energy charges using 5 minute interval data
- Energy Market and Congestion Loss Charge Details report displays 5 minute interval level pricing and injection and withdrawal values at a locational level, but data is not available per transaction
- To see interval level break down of transaction MW value, users must use PJM's ExSchedule tool

Potential New MSRS report

Real-Time Energy Transactions - 5 Minute
