

# **PJM Counter Party Daily Submissions Analyzed by First Energy**

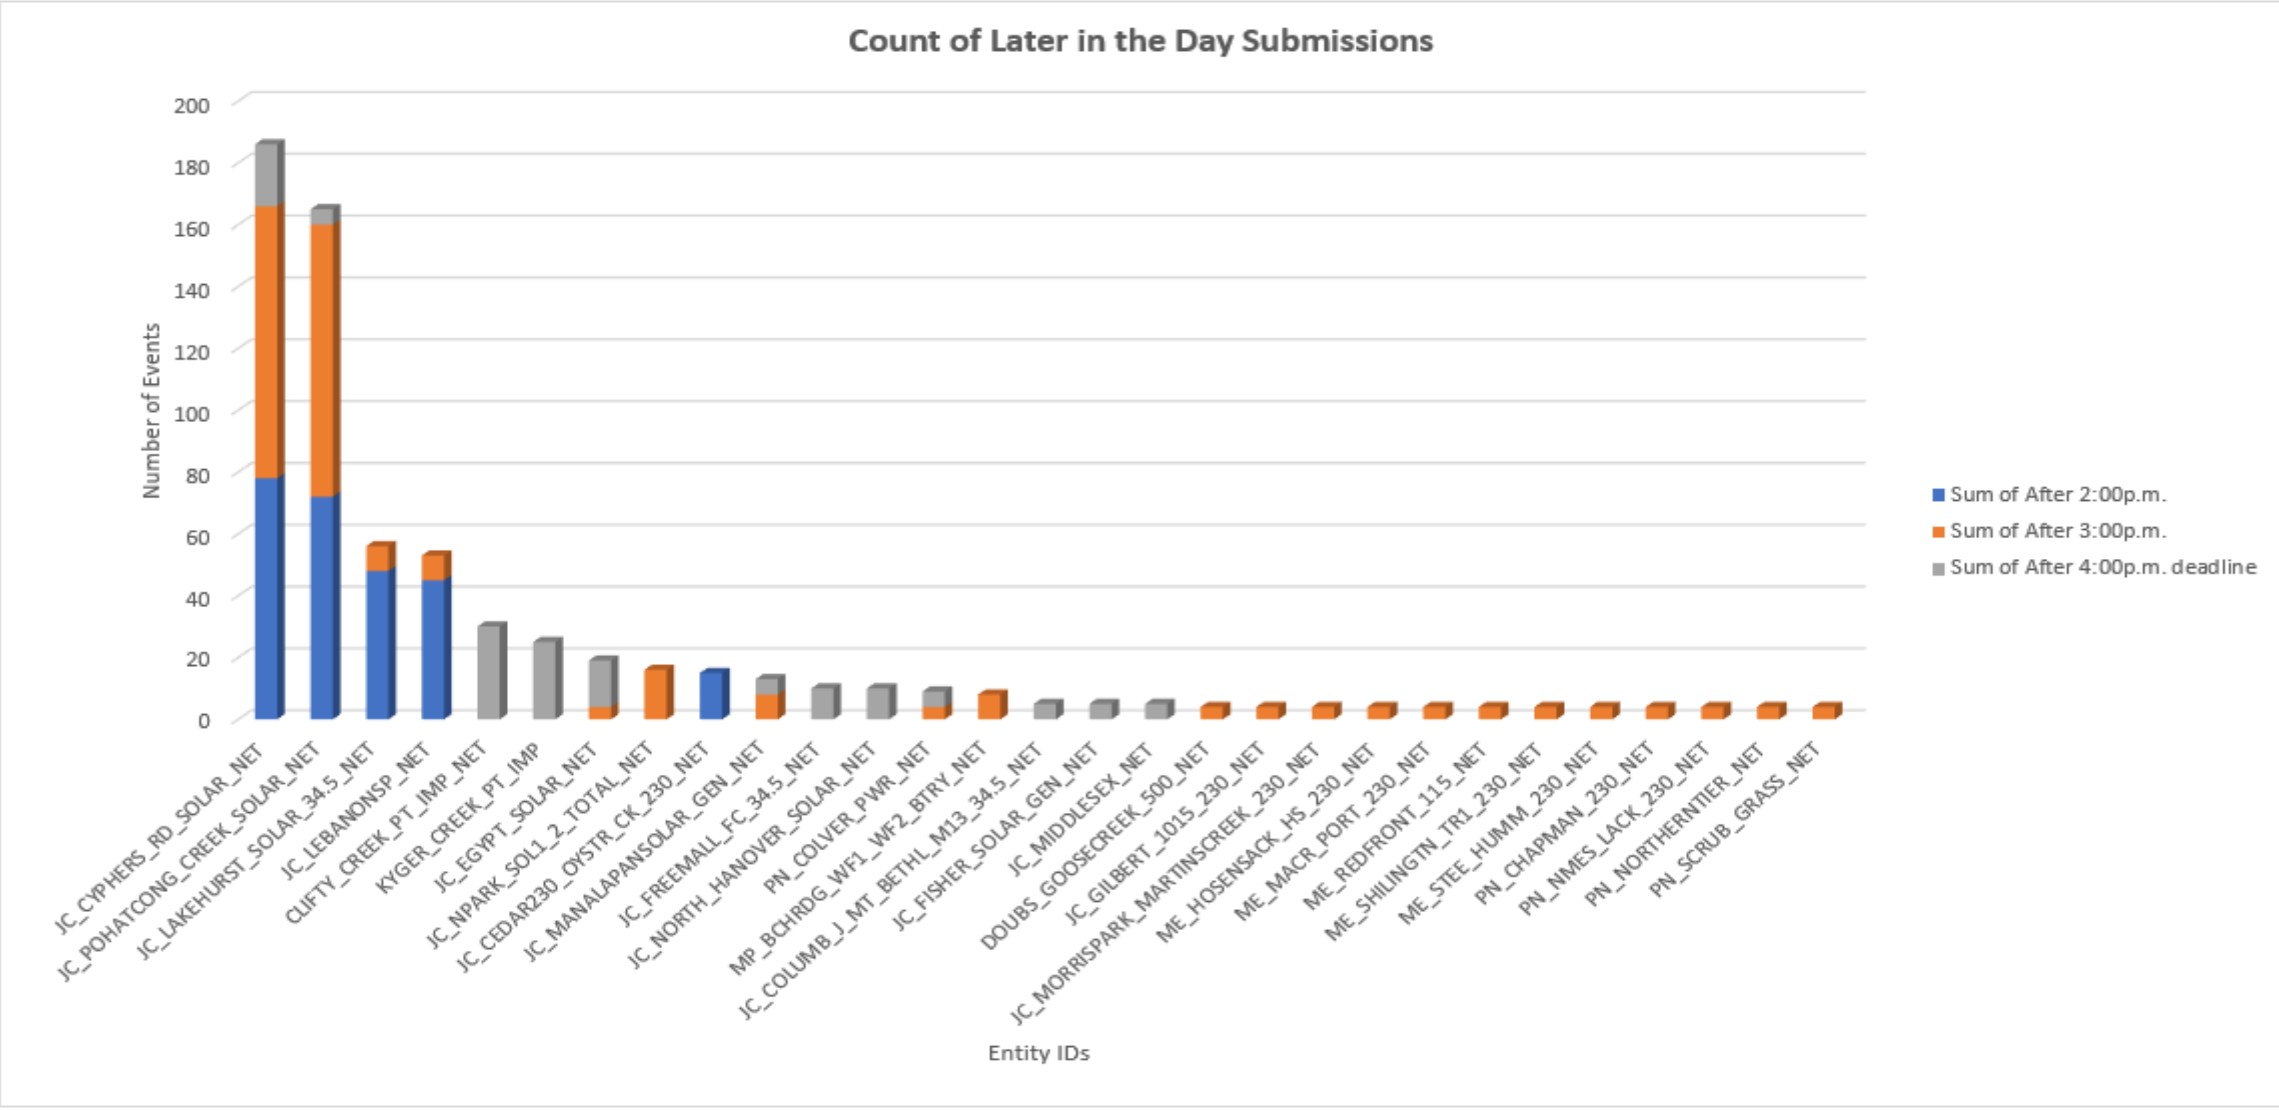

## Steps taken by First Energy to Alert Counter Parties of Missing Submissions

- First Energy emails a daily reminder to all counter parties who have not submitted their data to power meter
- The emails are scheduled to go out at 1:15pm, 2:15pm, 3:15pm and 4:15pm
- All EDC's within First Energy Territory were analyzed between May 1, 2020 to September 9, 2020 excluding August 3 & August 4 due to PJM web apps were out of commission
- In the next few slides, the timing before 3pm, before 4 and after 4pm are charted for the EDC's. The slides show all entities that have not submitted their data to Power Meter
- Most of the counter parties are getting their data in before the 1:15pm and 2:15pm emails

### Zonal Count of Missing Submissions

# Counter Parties with the Most Frequent and Latest Submissions

# Daily Submissions before 1pm can help prevent the following:

- **Reduce issues for PJM, First Energy, and Generators**
- **PJM would not have to reopen the days as much**
- **In schedules would not need rerun as often**
- **Reduce End of Month Corrections**
- **Reduce Resubmission of Loads**
- **Late submission doesn't allow enough time for the counterparties to check accuracy of data**
