

Automated Generator Notification

Aaron Baizman
Sr. Engineer – Markets Coordination
System Operator Subcommittee
March 29, 2018

- Explains the following to the MOC
- What unit is called
- Why the unit is being called on
- What time PJM would expect the unit online
- Communicates if the unit is offer capped
- Member responds back with acknowledgement

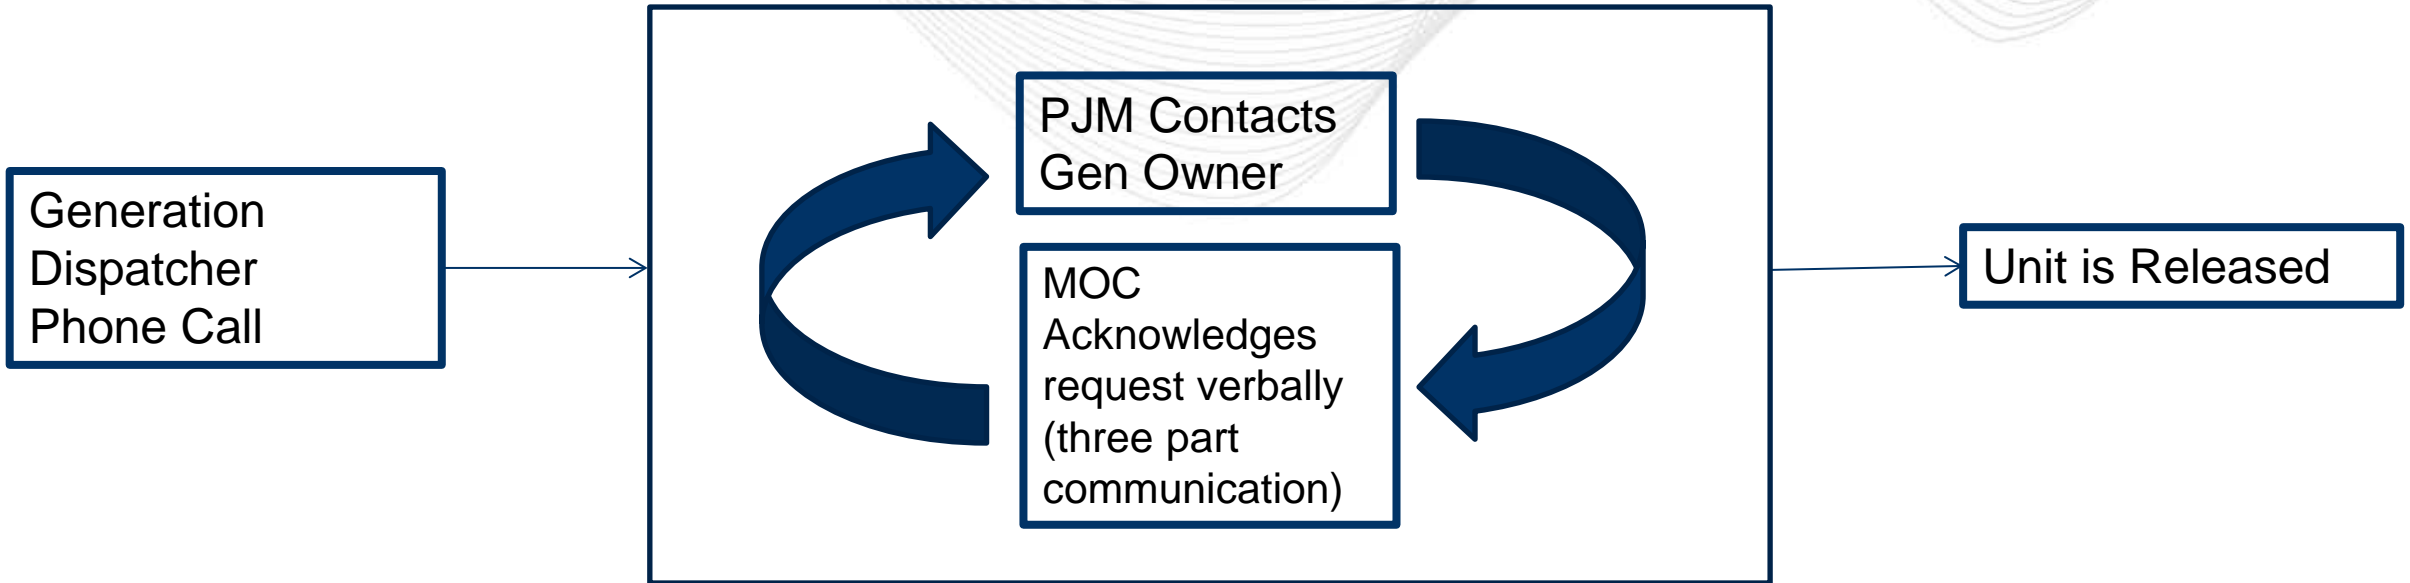

- Applies to Units called in Real-Time (typically CT's)
- Automatically Call on/Call off CT's efficiently and timely via ICCP/SCADA/DMP3/JETSTREAM
- Similar to other RTO Implementations (ISO-NE, CAL ISO, SPP,MISO)
- Compliant and Auditable
- Increase Efficiency by reducing Participant and PJM Operators phone time
- Enhance Reliability
- Mandatory for all Generation Owners and Unit Types in the future (TBD)

- Phone/Sat Phone are still available for backups
- Soliciting members for participation
 - aaron.baizman@pjm.com
- Questions?

Appendix Slides (flow diagrams)
