

EMERGENCY PROCEDURES RELEASE NOTES – MAY 2018

I. Overview

- Performance Assessment Hour converted to Performance Assessment Interval to support 5-Minute Settlements.
- Parent Region column added to Regions tab.
- Reduction Start Time added to Load Management Reduction messages.

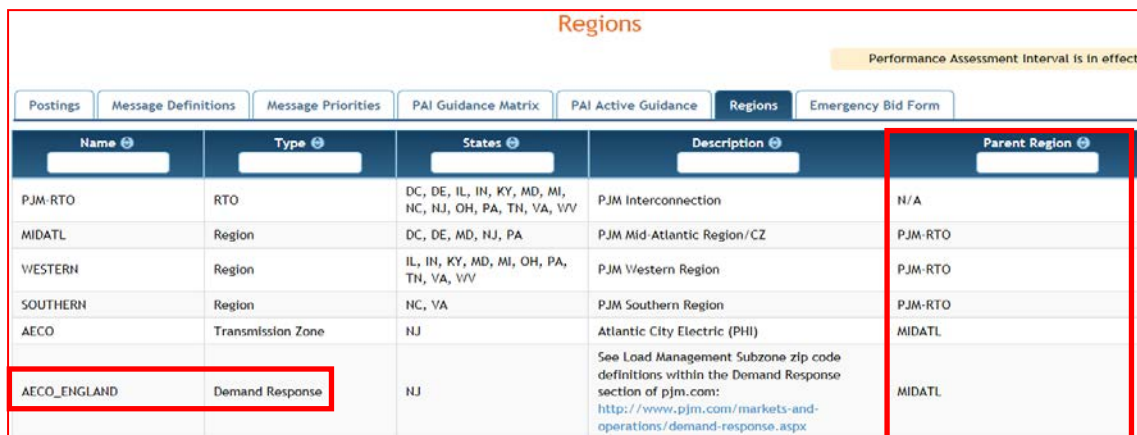

II. User Interface Changes

- Instances of PAH (Performance Assessment Hour) changed to PAI (Performance Assessment Interval) on global banners, tabs, posting tags, Message Definitions page and Active Guidance hyperlink.

The screenshot shows the PJM Emergency Procedures - Test interface. The 'Postings' tab is active. A red box highlights the 'PAI Active Guidance' tab in the navigation bar. Another red box highlights a yellow banner at the top right that reads 'Performance Assessment Interval is in effect'. A third red box highlights a 'PAI' tag in the 'Message Type' column of a message entry.

- Demand Response subzones added to Regions tab.
- Parent Region column added to Regions tab.

The screenshot shows the PJM Emergency Procedures - Test interface with the 'Regions' tab active. A red box highlights the 'AECO_ENGLAND' row in the table, which is a Demand Response subzone. Another red box highlights the 'Parent Region' column.
