

# Automated Generator Notification

Aaron Baizman  
Sr. Engineer – Markets Coordination  
System Operator Subcommittee  
July 5, 2018

# Recap - Future Call on Flow Chart

- Applies to Units called in Real-Time (typically CT's)
- Automatically Call on/Call off CT's efficiently and timely via ICCP/SCADA/DMP3/JETSTREAM
- Similar to other RTO Implementations (ISO-NE, CAL ISO, SPP,MISO)
- Compliant and Auditable
- Increase Efficiency by reducing Participant and PJM Operators phone time
- Enhance Reliability
- Mandatory for all CT's in the future and may expand to other units

- Future Call times
- Staggered times
- Including **Call off/Releases**
- Acknowledgement Process Still in Design

- Soliciting members for participation (3 members to date)
