

eDART Voltage Schedules Update

Augustine Caven
Sr. Lead Engineer, Generation
SOS
January 4, 2019

TO

Specify

TO-Specified or PJM Default Voltage Schedule

Specify Voltage Schedule Type: Voltage, Power Factor, or Reactive Power

Provide Target Voltage Schedule & Tolerance Band

Attach Voltage Schedule Letters (Optional)

Submit Exemption Requests

PJM

Review

Maintain List of Applicable Units (M-03 Sect. 3.11)

Review and Acknowledge Voltage Schedules

Coordinate adjacent TO/External Voltage Schedules

Approve Exemption Requests

Initiate **Annual** Voltage Schedule Reviews

GO

Acknowledge

Acknowledge Voltage Schedules

Provide feedback on Voltage Schedule through GO Comments

- eDART Voltage Schedules was released into Production during the December 11, 2018 eDART release.
- PJM pre-population of existing generator voltage schedules is currently underway.
 - Note that Transmission Owner Voltage Schedules button will remain **Red** until the Voltage Schedules have been populated, although e-mail notifications have not been enabled.
- PJM will contact Transmission Owners to perform an initial review of the pre-populated voltage schedules with a target completion of January 2019.
- Followed by Generation Owners initial review and acknowledgement of the voltage schedules, which will start in February 2019.
