<p>Resource Limitation Reporting via Markets Gateway</p> <ul style="list-style-type: none"> • Updates to Sections 1.1, 2.3, 2.5, 3.1, 3.2, 3.3, 3.4, 3.5, 5.2, 6.4, Attachment B • Attachment C: Supplementary Status Report removed <p>Resource Limitation Reporting: Daily Fuel Limited Gas-Fired Units</p> <ul style="list-style-type: none"> • Sections: 3.1, 3.2, 3.3, 3.4, 6.4 <p>Administrative Changes:</p> <ul style="list-style-type: none"> • Sections 2.2, 2.4.7, 4.1, 4.3, 4.4, 4.5, 5.1, 7.1 	
Reason for change:	

Periodic cover to cover review and changes to align with new Markets Gateway functionality for Resource Limitation Reporting to be implemented 6.1.2019.

Summary of the changes:**Resource Limitation Reporting via Markets Gateway**

- Terminology related to “Fuel Limited” units changed to “Resource Limited” to clarify applicability of reporting requirements. Resource limitations include primary or alternate fuel, emissions, demineralized or cooling water, other consumables.
- References to Supplementary Status Report (SSR) for reporting resource limitations removed and replaced with instructions to use new Markets Gateway page (Generator > Unit > Resource Limitations; targeted for implementation 6/1/2019).
- New Exhibit added to Section 6.4 clarifying Resource Limitation Reporting and Notification requirements by Unit/Fuel type.
- Impacted Sections:
 - Updates to Sections 1.1, 2.3, 2.5, 3.1, 3.2, 3.3, 3.4, 3.5, 5.2, 6.4, Attachment B
 - Attachment C: Supplementary Status Report removed

Resource Limitation Reporting: Daily Fuel Limited Gas-Fired Units

- Gas-fired CT/Steam units with daily fuel limitations are considered Resource Limited if they have less than 24 hours runtime at maximum capacity, and should be reported via new Markets Gateway page.
- Gas-fired CT/Steam units with minimum level daily fuel limitations (less than 8 hours runtime at maximum capacity) should make a verbal notification to PJM dispatch.
- When PJM has declared Conservative Operations/Hot or Cold Weather Alert, Gas-fired CT/Steam units should remain available for economics, to ensure that PJM tools economically schedule the units, unless PJM Dispatch directs that they are placed in Maximum Emergency.
 - This change was made to align with existing language in the PJM Operating Agreement for designating fuel limited resources as Maximum Emergency.
- Impacted Sections: 3.1, 3.2, 3.3, 3.4, 6.4

Administrative Changes:

- Section 2.2 – Removed reference to SERC BAL-002 reserve policy (retired). Updated RF BAL-002 document link and naming from ‘Requirement’ to ‘Regional Criteria’.
- Section 2.4.7 – Updated M-3 section reference section 3.7
- Section 4.1, 4.3, 4.4, 4.5, 5.1 – Removed of mention of Supplementary Status Report (SSR) where not needed
- Section 4.4.3 – updated link and version number to the new NERC Reliability Guideline: Generating Unit Operations During Complete Loss of Communications – Version 3
- Section 7.1 – Revised email address from dispsup@pjm.com to EOP011forms@pjm.com
