

Generation Availability and Outage Coordination

David Schweizer – PJM
Manager, Generation
System Operations Subcommittee
March 19, 2019

- Follow normal reporting procedures
 - Submit eDART tickets as required, including info-only
 - Verbally communicate potential changes of unit status to PJM Dispatch as necessary
- Update Markets Gateway
 - Utilize the Resource Limitations page to communicate any operational limitations, e.g. deliveries of fuel, chemicals, demin water, etc. needed for plant operations.
- Parameter Limited Schedule Exceptions
 - For limitations that may impact a unit's operating parameters, such as lack of staffing due to sickness where other arrangements cannot be made, use the exception process outlined in PJM Manual 11, Section 2.3.4.3

- For generation concerns/questions greater than 7 days out
 - Update eDART and Markets Gateway as appropriate
 - Contact PJM Generation Dept. directly using dedicated hotline (610) 666-2282
 - Covered by Gen Dept. staff – currently remote from PJM campus
 - Generation Dept. can also be reached via shared email box at GenOutageCoordination@pjm.com
- Key takeaway is **Communication** – early and often as conditions change

- A new eDART survey being developed to allow members to share longer term concerns with PJM
 - Will be open indefinitely, similar to eDART Contact Survey
 - Allows members to provide PJM additional information such as:
 - Potential delays or restrictions on future fuel/consumable item deliveries.
 - Contractor/staff health concerns that may impact current and near-term scheduled outages
 - Can be updated as often as necessary.
 - Will be monitored by PJM staff periodically for changes.

- PJM evaluating currently scheduled outages
- Currently no plans to rescind approval of scheduled outages
- Generation Owners are asked to identify concerns with completing outages as planned, and PJM plans to work with Generation Owners on viable solutions for mitigating the impacts of potential delays
- Generation Owners encouraged to immediately notify PJM Dispatch of any changes to expected return date of active outages
