

Nuclear Bus Voltage Limit

eDART Enhancement

Paul Dajewski
Sr. Lead Reliability Engineer
SOS-Joint - July 13, 2020

- Nuclear Plant Generation Owners must operate their facilities in compliance with NERC Standards, including NUC-001
- Nuclear Plant Interface Requirements (NPIRs) are developed to satisfy the requirements of NUC-001
- Plant specific NPIRs, in part, define safe shutdown voltage limits
- Transmission Entities party to the NPIR, monitor the transmission system as not to violate the NPIRs
- Additional information available in [PJM Manual 39](#)

- Centralized database of NPIR limits
- Common point of reference (PJM/TO/GO)
- Historian
- Dedicated user interface
- Automatic data validation
- Effective ticket dating

- Current Phase: Pre-development
- Next Steps:
 - NGOUG on July 21
 - Additional details at upcoming SOS meetings
