**1. Administration (1:00 – 1:15)**

Ms. Burlew called the meeting to order. Mr. Baker called roll and reviewed the draft minutes from February 8, 2013 (meeting #18). The minutes were approved without changes.

**2. Demand Response Issues (1:15 – 3:45) (issue tracking)**

The CSTF reviewed sub-problem statements for the following two items in the [DR Issue Charge](#).

A) Auditing of DR contracts

**\*\*Going forward, this issue will be referred to as “Frequency Capability Verification”\*\***

Mr. Carretta reviewed education on the sub-problem statement developed for this issue. It was noted that the sub-problem statement needed a few slight modifications and would be brought back to the group at the next meeting.

Despite the slight changes needed, the group decided to vote in the meeting on moving this problem statement forward using the WebEx tool. 22/32 votes were cast to continue working this problem statement. 10/32 voted to suspend discussion. Given this simple majority, the group will continue working the issue.

B) Interaction of Peak Load Contribution ("PLC") with end-user RPM cost assignment and DR Resource RPM revenue, and implication to DR resource auction participation

Two sub-problem statements were reviewed for this issue. After discussion, it was decided that companies would vote this issue between meetings via an online SurveyMonkey. The survey was issued on Tuesday March 5<sup>th</sup> and closed on Friday March 8<sup>th</sup>. Results will be discussed at the next meeting.
