

AI #	Action Item	Status
11	Do a backcast of a possible transaction rate (design component 4, option A) to see what it would look like	In Progress
14	Need clarification of exports and their role in uplift (we have this for imports already)	In Progress
18	Put together slides for "transaction in the supply and demand deviation category"	In Progress
22	Look into how other ISOs and RTOs allocate uplift costs	In Progress
23	Summarize what we've already done or what is in the SOM related to causes of uplift. Can start with Action Item #30 and show those in order of precedence. Include seasonality or unusual events in the analysis.	In Progress
24	Members to submit solution options for the matrix	In Progress
25	PJM to clarify row 17 option B if this is different from status quo ( <i>RT Load (metered), RT Exports --- Deviations + RT Imports (Interchange Deviations from DA schedule for imports and exports)</i> )	In Progress
