

# PJM Perspectives on Clean Procurement

Walter Graf, Sr. Director – Economics

RASTF

February 28, 2022

- We have heard a range of perspectives shared on the value of incorporating clean resource attributes (and/or social cost of carbon) into the PJM markets
  - Stakeholders generally supportive of exploring solution options
  - Differing opinions on best solution pathways
  - General consensus that more discussion & analysis is needed before selecting even high-level market design option

**PJM developing a draft issue charge to outline additional scope and guide further work on opportunities for the regional procurement of clean resource attributes beyond Q1 2022**

# Initial Direction on Draft Issue Charge Content

Discuss market/  
solution objectives

Discuss options for  
product definition

Develop representative  
market design options  
with sufficient detail to  
enable qualitative and  
quantitative analysis

Determine relevant  
questions for analysis.  
Initial outcomes of interest  
include: cost impacts,  
reliability implications,  
GHG emissions

Determine analytical  
approach and conduct  
analysis

Select one or more  
market design options for  
further development
