

4.3 Construction and Interconnection

4.3.1 No Conferral of Rights

This Agreement shall confer no rights upon either Party to enter the right-of-way or property of the other Party, or interconnect its facilities, either physically or electrically, to the facilities of the other Party.

4.3.2 Interconnection Agreement

Prior to interconnection, the Parties shall enter into an interconnection agreement setting forth the terms and conditions for (1) the interconnection of the Parties' transmission facilities, and (2) the ongoing relationship of the Parties with regard to the interconnection.

4.3.3 Other Agreements

The Parties recognize that, where appropriate under the circumstances of a particular interconnection, the Parties may enter into other agreements (beyond the Interconnection Agreement referred to in Section 4.3.2 above) such as construction agreements. Such other agreements shall be filed with FERC, if required. The terms and conditions of such other agreements are not addressed in this Agreement.
