

Revisions to Manual 35  
(Other than Conforming to Governing Agreement)

	Defined Term	Current Definition	Proposed Revisions	Reason(s) For Changes
1.	<b>Learning Management System</b>	The PJM LMS is a Web-based system used to track training and certification information of System Operators in PJM. This training information is used to measure compliance with the PJM System Operator Training Requirements outlined in Attachment C of the Control Center Requirements Manual (M-01).	The PJM LMS is a Web-based system used to track training and certification information of System Operators in PJM. This training information is used to measure compliance with the PJM System Operator Training Requirements outlined in <u>Manual 40: Training and Certification Requirements</u> . <del>Attachment C of the Control Center Requirements Manual (M-01).</del>	Manual 1, Attachment C is currently entitled Attachment C: Notification of Member Company System Outages. It is not the applicable manual provision anymore as Attachment C: PJM System Operator Training Requirements was moved in 2007 to Manual 40: Training and Certification Requirements. Therefore, the reference is being corrected to refer to Manual 40.
