

EMERGENCY PROCEDURES RELEASE NOTES – MAY 2018

I. Overview

- Performance Assessment Hour converted to Performance Assessment Interval to support 5-Minute Settlements.
- Parent Region column added to Regions tab.
- Reduction Start Time added to Load Management Reduction messages.

II. User Interface Changes

- Instances of PAH (Performance Assessment Hour) changed to PAI (Performance Assessment Interval) on global banners, tabs, posting tags, Message Definitions page and Active Guidance hyperlink.

The screenshot shows the 'Postings' tab in the PJM Emergency Procedures - Test interface. The 'PAI' tag in the Message Type column is highlighted with a red box. A banner at the top right of the interface reads 'Performance Assessment Interval is in effect' and 'Drill: Performance Assessment Interval is in effect'.

- Demand Response subzones added to Regions tab.
- Parent Region column added to Regions tab.

The screenshot shows the 'Regions' tab in the PJM Emergency Procedures - Test interface. A table lists various regions and subzones. The 'AECO_ENGLAND' row is highlighted with a red box, showing it has a 'Demand Response' type. The 'Parent Region' column is also highlighted with a red box.

Name	Type	States	Description	Parent Region
