

The graph to the right shows the number of instances when transmission outages with potential impact are cancelled or rescheduled after the DA market closing. The number of instances are also shown as percentages to the total number of outages to provide a holistic view. These are statistics for the entire PJM RTO.

Transmission Outage Statistics 2013
Cancellations & Reschedules After DA Market Closing

■ Instances of TO Late Cancellations After DA Market Closing	8	19	7	15	5	23	4	6	15	15	13	9	139
■ Instances of TO Late Reschedules After DA Market Closing	27	31	38	16	17	40	13	15	31	32	24	29	313
□ Total Outage Tickets (* includes cancelled)	1324	1370	1918	2580	2450	1737	1075	1180	2348	2465	1947	1771	22165
■ Cancellation AND Resheduling %	2.6%	3.6%	2.3%	1.2%	0.9%	3.6%	1.6%	1.8%	2.0%	1.9%	1.9%	2.1%	2.0%

The graph to the right shows the late cancellation and rescheduling statistics by individual transmission zone. The bars indicate the number of instances as a percentage of total outages in a particular zone to provide a normalized comparison. Zones 'A' through 'G' have no instances of late cancellations or rescheduling of transmission outages with potential impact.
