Emissions Data

Executive Summary

(July 2017)

- Existing Capacity: Coal represents approximately 55 percent of the total installed capacity in the PJM portion of Kentucky while natural gas represents approximately 42 percent. This differs from PJM where natural gas are relatively even at 35 and 34 percent respectively.
- Interconnection Requests: Natural gas represents 93 percent of new interconnection requests in Kentucky.
- Deactivations: 147 MW of capacity in Kentucky retired in 2016. This compares to 392 MW of capacity retirements PJM-wide during the same year.
- RTEP 2016: Kentucky RTEP 2016 projects total nearly \$49 million of investment. Over half represents baseline-type projects.
- Load Forecast: Kentucky load growth is nearly flat, averaging between 0.3 and 0.5
 percent per year over the next 10 years. This aligns with PJM RTO load growth projections.

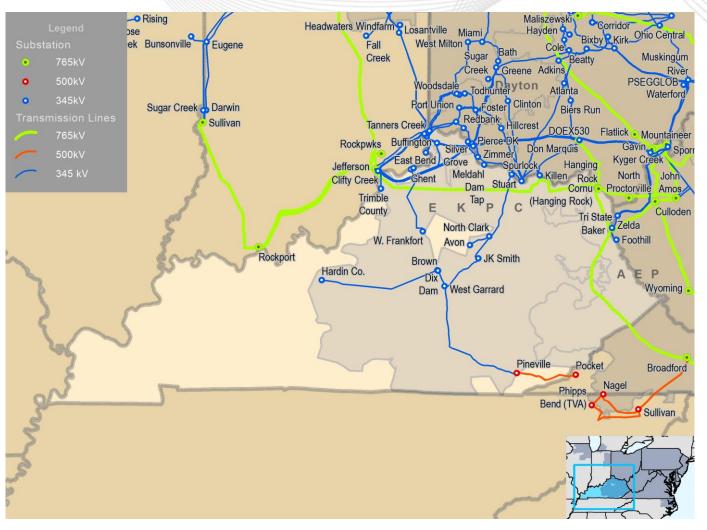

Executive Summary Cont.

(July 2017)

- 2020/21 Capacity Market: Only the Eastern Kentucky Power Cooperative transmission zone portion of Kentucky load participates in the capacity market. Compared to the PJM footprint, the distribution of generation, demand response, and energy efficiency in the EKPC zone is similar.
- 6/1/2014 5/31/2017 Market Performance: Kentucky's average daily locational marginal prices were consistent with the PJM average daily LMPs.
- **Emissions:** 2016 carbon dioxide emissions are slightly up from 2015; sulfur dioxides saw a significant year-over-year drop; nitrogen oxides hold flat from 2015.

PlanningGeneration Portfolio Analysis

6 PJM©2016

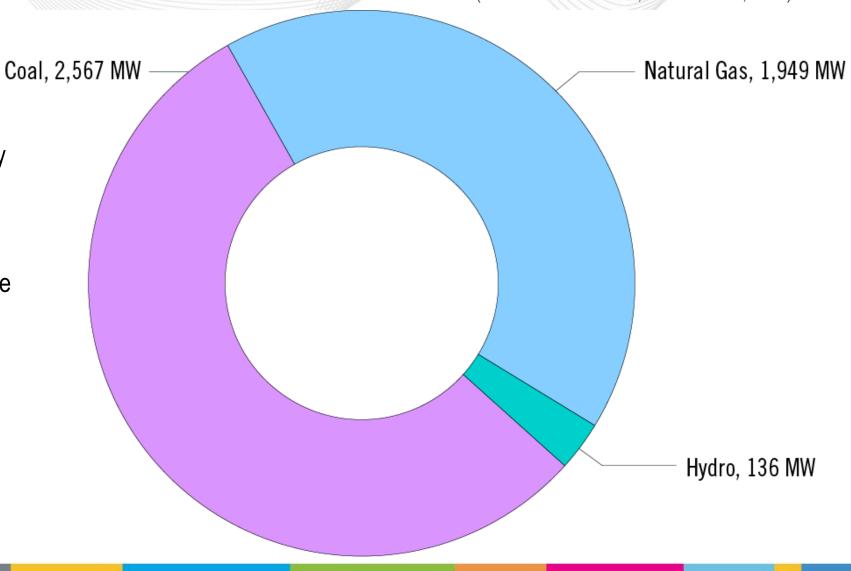

Kentucky – Existing Installed Capacity

(MW submitted to PJM, December 31, 2016)

Summary:

Natural gas represents approximately 42 percent of the total installed capacity in Kentucky while coal represents approximately 55 percent.

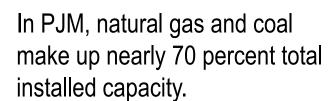

Overall in PJM, natural gas and coal are relatively even and 35 percent and 34 percent, respectively.

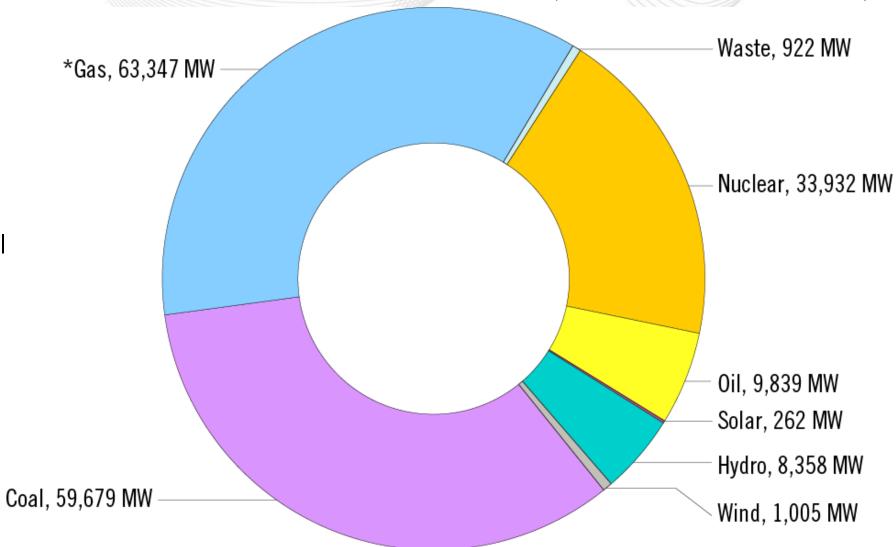

PJM – Existing Installed Capacity

(MW submitted to PJM, December 31, 2016)

| * Gas Contains | | | | | |
|----------------|-----------|--|--|--|--|
| Natural Gas | 62,941 MW | | | | |
| Other Gas | 405 MW | | | | |

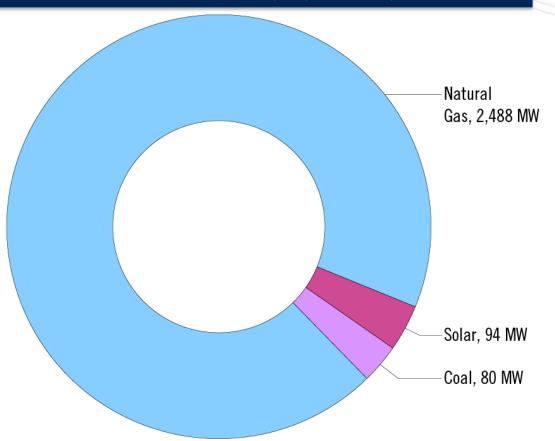

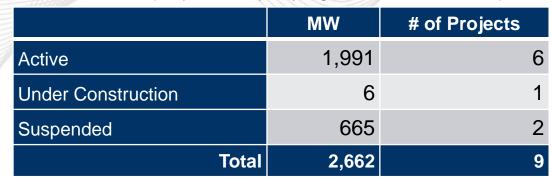

Kentucky – Interconnection Requests

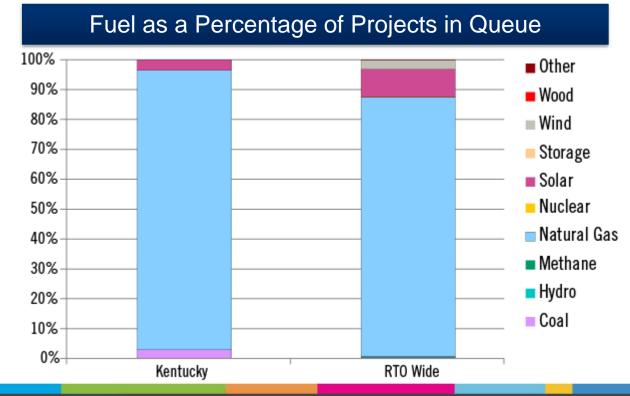

(Requested Capacity Rights, December 31, 2016)

Natural gas represents more than 93 percent of new interconnection requests in Kentucky.

www.pjm.com 10 PJM©2016

Kentucky – Progression History Interconnection Requests

(Requested Capacity Rights, 2004 - 2016)

Following Final Agreement execution, 20 MW of capacity withdrew from PJM's interconnection process. Another 671 MW have executed agreements but were not in service as of December 31, 2016. Overall, 1% of requested capacity MW reaches commercial operation. The PJM average is 10%.

Kentucky – 2016 Generation Deactivations

(Capacity, As of December 31, 2016)

| Unit | MW Capacity | TO Zone | Age | Actual Deactivation Date |
|--------|----------------|------------|-----|--------------------------------|
| Dale 3 | 74 | EKPC | 56 | 4/16/2016 |
| Dale 4 | 73 | EKPC | 53 | 4/16/2016 |

Summary:

- Two generating units in KY deactivated in 2016
- 11 generating units totaling 392 MW of capacity deactivated in PJM in 2016

Transmission Infrastructure Analysis

13 PJM©2016

Kentucky – RTEP Baseline Projects

Kentucky – RTEP Baseline Projects

Kentucky Baseline Project Driver

(Greater than \$5 million)

| Map ID | Project ID | Project | Baseline Load Growth/ Deliverability & Reliability | Congestion Relief - Economic | Operational Performance | Generator Deactivation | TO Criteria Violation | Required Date | Cost (\$M) | Designated Entity* | 2016 TEAC Review |
|-----------|---------------|--|---|---------------------------------|----------------------------|---------------------------|--------------------------|------------------|---------------|-----------------------|---------------------|
| 1 | b2750.1 | Retire Betsy Layne 138/69/43 kV station and replace it with the greenfield Stanville station about a half mile north of the existing Betsy Layne station | | | | | • | 12/1/2016 | \$28.10 | AEP | 1/24/2017 |
| | b2750.2 | Relocate the Betsy Layne capacitor bank to the Stanville 69 kV bus and increase the size to 14.4 MVAR | | | | | • | 12/1/2016 | <\$0 M | AEP | 1/24/2017 |

Note: Baseline upgrades are those that resolve a system reliability criteria violation.

Kentucky – RTEP Network Projects

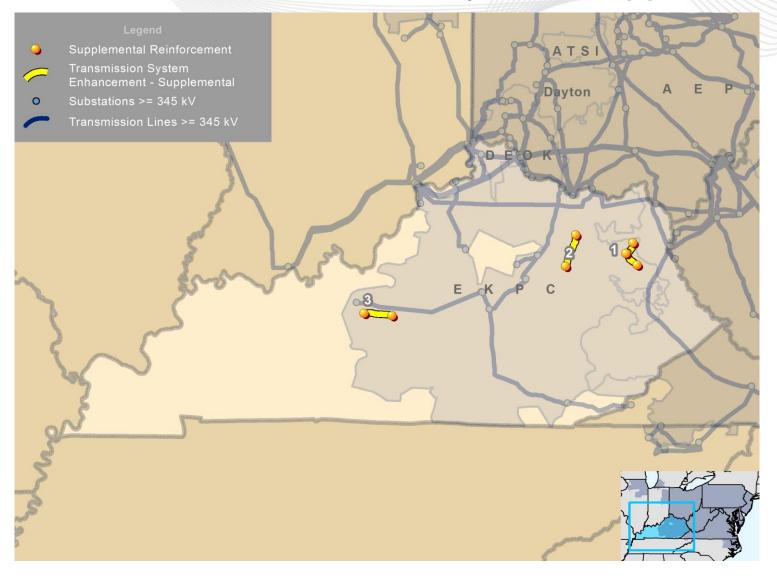

(Greater than \$5 million)

| | | | Kentucky Network Project Drivers | | | | | | |
|-----------|---------------|---------|----------------------------------|---|---|------------------|---------------|---------------|------------------------|
| Map ID | Project ID | Project | Generation Interconnection | Merchant Transmission Interconnection | Long-term Firm Transmission Service | Required Date | Cost (\$M) | TO Zone(s) | 2016 TEAC Review |
| | | None | | | | | | | |

Note: Network upgrades are new or upgraded facilities required primarily to eliminate reliability criteria violations caused by proposed generation, merchant transmission or long term firm transmission service requests.

Kentucky - TO Supplemental Projects

Kentucky – TO Supplemental Projects

(Greater than \$5 million)

| Map ID | Project ID | Project | Required Date | Cost (\$M) | TO Zone(s) | 2016 TEAC Review |
|--------|---------------|--|------------------|---------------|---------------|------------------------|
| 1 | s1163 | Rebuild the existing 3/0 ACSR Airport Rd-Newfoundland-Mazie 69 kV, line section using 556.5 MCM ACSR/TW conductor | 6/1/2021 | \$6.68 | EKPC | 7/26/2016 |
| 2 | s1164 | Rebuild the existing 4/0 ACSR Hope - Hillsboro 69 kV, line section using 556.5 MCM ACSR/TW conductor | 12/1/2020 | \$8.32 | EKPC | 7/26/2016 |
| 3 | s1165 | Rebuild the existing 1/0 ACSR Stephensburg - Hodgenville 69 kV, line section using 556.5 MCM ACSR/TW conductor | 12/1/2020 | \$5.88 | EKPC | 7/26/2016 |

Note: Supplemental projects are transmission expansions or enhancements that are used as inputs to RTEP models, but are not required for reliability, economic efficiency or operational performance criteria, as determined by PJM.

*AEP and Duke Energy serve load other than in Kentucky. The Summer Peak and Winter Peak MW values in this table each reflect an estimated amount of forecasted load to be served by each of those transmission owners solely in Kentucky. Estimated amounts were calculated based on the average share of each transmission owner's real-time summer and winter peak load located in Kentucky over the past five years.

*PJM's 2017 forecast reflects methodology improvements implemented in 2016: variables to account for equipment and appliance saturation and efficiency, distributed solar generation adjustments and more refined treatment of weather data.

NOTE: Demand Response and Energy Efficiency are reported to PJM by Transmission Zone. The numbers above reflect the state's pro-rata share of cross-state zones for illustrative purposes.

Markets Market Analysis

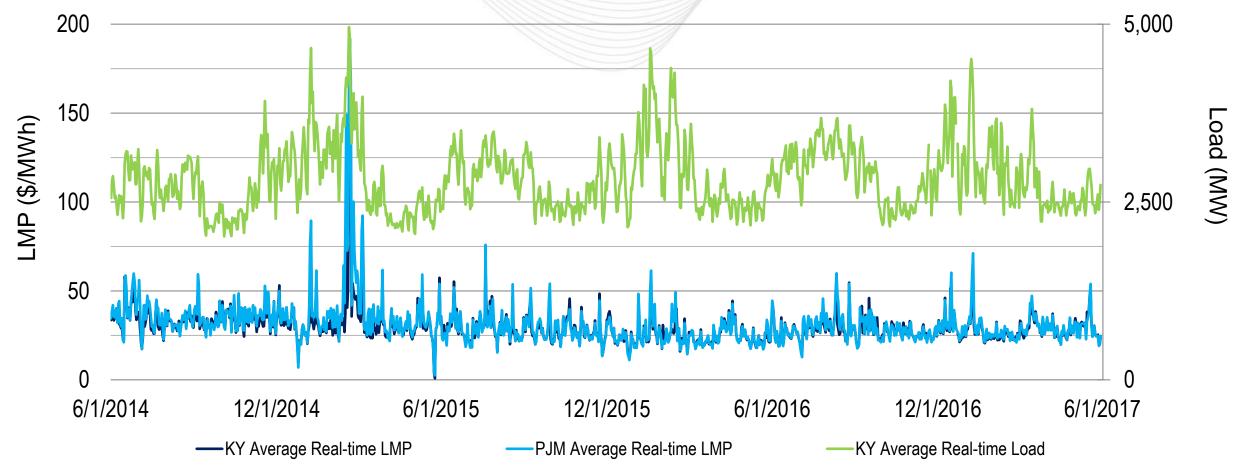

28 PJM©2016

Kentucky - Average Daily Load and LMP

(June 1, 2014 - May 31, 2017)

Kentucky's average daily LMPs generally align with the PJM average daily LMP

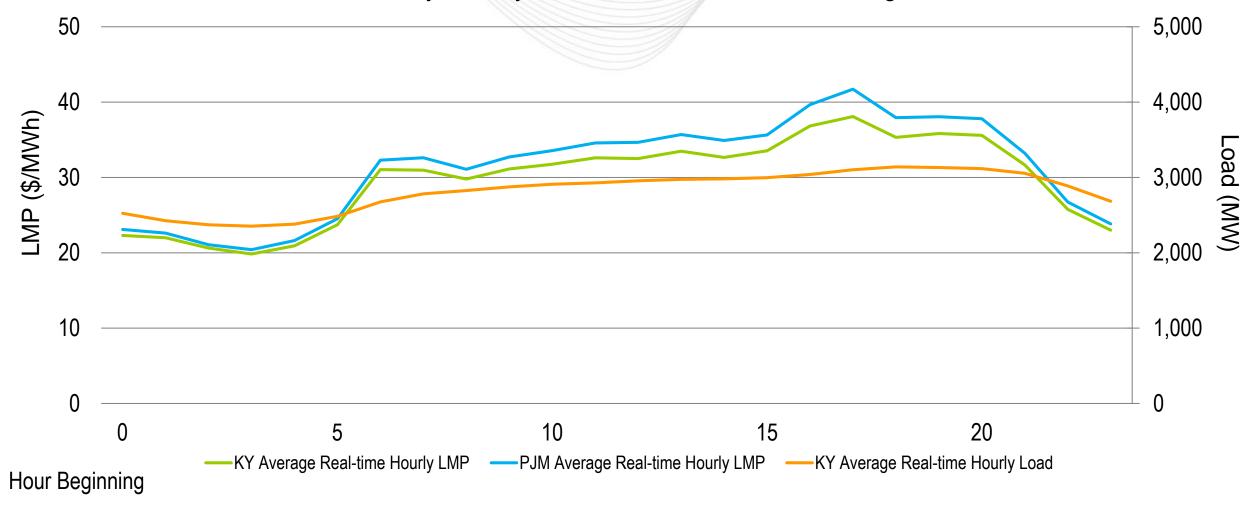

Kentucky - Hourly Average LMP and Load

(June 1, 2014 - May 31, 2017)

Kentucky's hourly LMPs were below the PJM average.
