2018 Kentucky State Infrastructure Report
(January 1, 2018 – December 31, 2018)

May 2019

This report reflects information for the portion of Kentucky within the PJM service territory.
1. Planning
   • Generation Portfolio Analysis
   • Transmission Analysis
   • Load Forecast

2. Markets
   • Capacity Market Results
   • Market Analysis

3. Operations
   • Emissions Data
• **Existing Capacity:** Coal represents approximately 55.3 percent of the total installed capacity in the PJM portion of Kentucky while natural gas represents approximately 41.8 percent. This differs from PJM where natural gas and coal are at 40.2 and 30.7 percent of total installed capacity.

• **Interconnection Requests:** Natural gas represents approximately 69.2 percent of new interconnection requests in Kentucky.

• **Deactivations:** Kentucky had no generation deactivations or deactivation notifications in 2018.

• **RTEP 2018:** Kentucky RTEP 2018 projects total more than $72 million in investment. Approximately 76 percent of that represents supplemental projects. These investment figures only represent RTEP projects that cost at least $5 million.

• **Load Forecast:** Kentucky load growth is nearly flat, averaging between 0.4 and 0.5 percent per year over the next 10 years. This aligns with PJM RTO load growth projections.
1/1/2018 – 12/31/2018 Market Performance: Kentucky’s average LMPs were consistently at or below PJM average LMPs. Coal resources represented 47.7 percent of the generation used in Kentucky.

Emissions: 2018 carbon dioxide emissions decreased from 2017; 2018 nitrogen oxide dioxide emissions fell slightly from 2017 levels while sulfur dioxide emissions remained steady.
Planning
Generation Portfolio Analysis
PJM – Existing Installed Capacity
(CIRs, December 31, 2018)

- Coal, 56,653 MW
- Natural Gas, 74,194 MW
- Nuclear, 33,362 MW
- Waste, 865 MW
- Oil, 9,499 MW
- Solar, 640 MW
- Hydro, 8,346 MW
- Wind, 1,165 MW
Kentucky – Existing Installed Capacity
(MW submitted to PJM, December 31, 2018)

Summary:
Natural gas represents approximately 41.8 percent of the total installed capacity in the Kentucky territory while coal represents approximately 55.3 percent.

Overall in PJM, natural gas represents approximately 40.2 percent of installed capacity while coal represents 30.7 percent.
Natural gas represents approximately 69.2 percent of new interconnection requests in Kentucky.

*Note: Nameplate Capacity represents a generator's rated full power output capability.
Kentucky – Percentage of Projects in Queue by Fuel Type

Kentucky – Future Capacity Mix

Based on known queued interconnection requests and deactivation notices through December 31, 2022, adjusted to reflect the probability of commercialization as indicated by historical trends specific to an interconnection request’s state/zonal location and fuel type.

- **Coal**: 2,567 MW
- **Gas**: 3,278 MW
- **Solar**: 4 MW
- **Hydro**: 136 MW

![Bar Chart]

**Existing** and **Future** capacity mix percentages.
Kentucky – Progression History Interconnection Requests

Projects under construction, suspended, in service, or withdrawn (as of December 31, 2018)

- Projects withdrawn after final agreement
  - 1 Interconnection Service Agreement – 80 MW (Nameplate Capacity, 80 MW)

- Percentage of planned capacity and projects reached commercial operation
  - 0.7 % requested capacity megawatt
  - 10 % requested projects
Kentucky had no generation deactivations or deactivation notifications in 2018.
Planning
Transmission Infrastructure Analysis
Kentucky – RTEP Baseline Projects
(Greater than $5 million)

Kentucky had no baseline project upgrades in 2018.

Note: Baseline upgrades are those that resolve a system reliability criteria violation.
Note: Network upgrades are new or upgraded facilities required primarily to eliminate reliability criteria violations caused by proposed generation, merchant transmission or long term firm transmission service requests.

Kentucky – TO Supplemental Projects
(Greater than $10 million)

Note: Supplemental projects are transmission expansions or enhancements that are not required for compliance with the following PJM criteria: system reliability, operational performance or economic criteria, pursuant to a determination by the Office of the Interconnection and is not a state public policy project.

* PJM notes that AEP and Duke Energy serve load other than in Kentucky. The Summer Peak and Winter Peak MW values in this table each reflect an estimated amount of forecasted load to be served by each of those transmission owners solely in Kentucky. Estimated amounts were calculated based on the average share of each transmission owner's real-time summer and winter peak load located in Kentucky over the past five years.

Markets
Market Analysis
Kentucky’s average daily LMPs generally aligned with PJM average daily LMPs.

Note: The price spike in January reflects the Cold Snap that lasted from 12/28/17 to 1/7/2018.
Kentucky – Average Hourly LMP and Load
(January 1, 2018 – December 31, 2018)

Kentucky’s hourly LMPs were below PJM average hourly LMPs.
Kentucky – Energy Production
(January 1, 2018 – December 31, 2018)

Amount of energy produced by Kentucky generation within the PJM service territory in 2018.

- Coal, 47.7%
- Imports, 47.2%
- Natural gas, 4.7%
- Hydro, 0.4%

Note: More than 24.3 million megawatt hours of energy, including imports, served the portion of Kentucky within the PJM footprint in 2018.

  - 2006: 2,000
  - 2007: 1,950
  - 2008: 1,900
  - 2009: 1,850
  - 2010: 1,800
  - 2011: 1,750

- **SO₂ and NOₓ (lbs/MWh):**
  - 2005: 18
  - 2006: 15
  - 2007: 12
  - 2008: 9
  - 2009: 6
  - 2010: 3
  - 2011: 0
Please note that PJM has historically used $5 million as the threshold for listing projects in the RTEP report. Beginning in 2018, it was decided to increase this cutoff to $10 million. All RTEP projects with costs totaling at least $5 million are still included in this state report. Going forward, the inclusion of RTEP projects in the State Infrastructure reports will be consistent with the RTEP listing cutoff of $10 million.

For a complete list of all RTEP projects, including those below the RTEP threshold of $10 million, please visit the “RTEP Upgrades & Status – Transmission Construction Status” page on pjm.com.
