

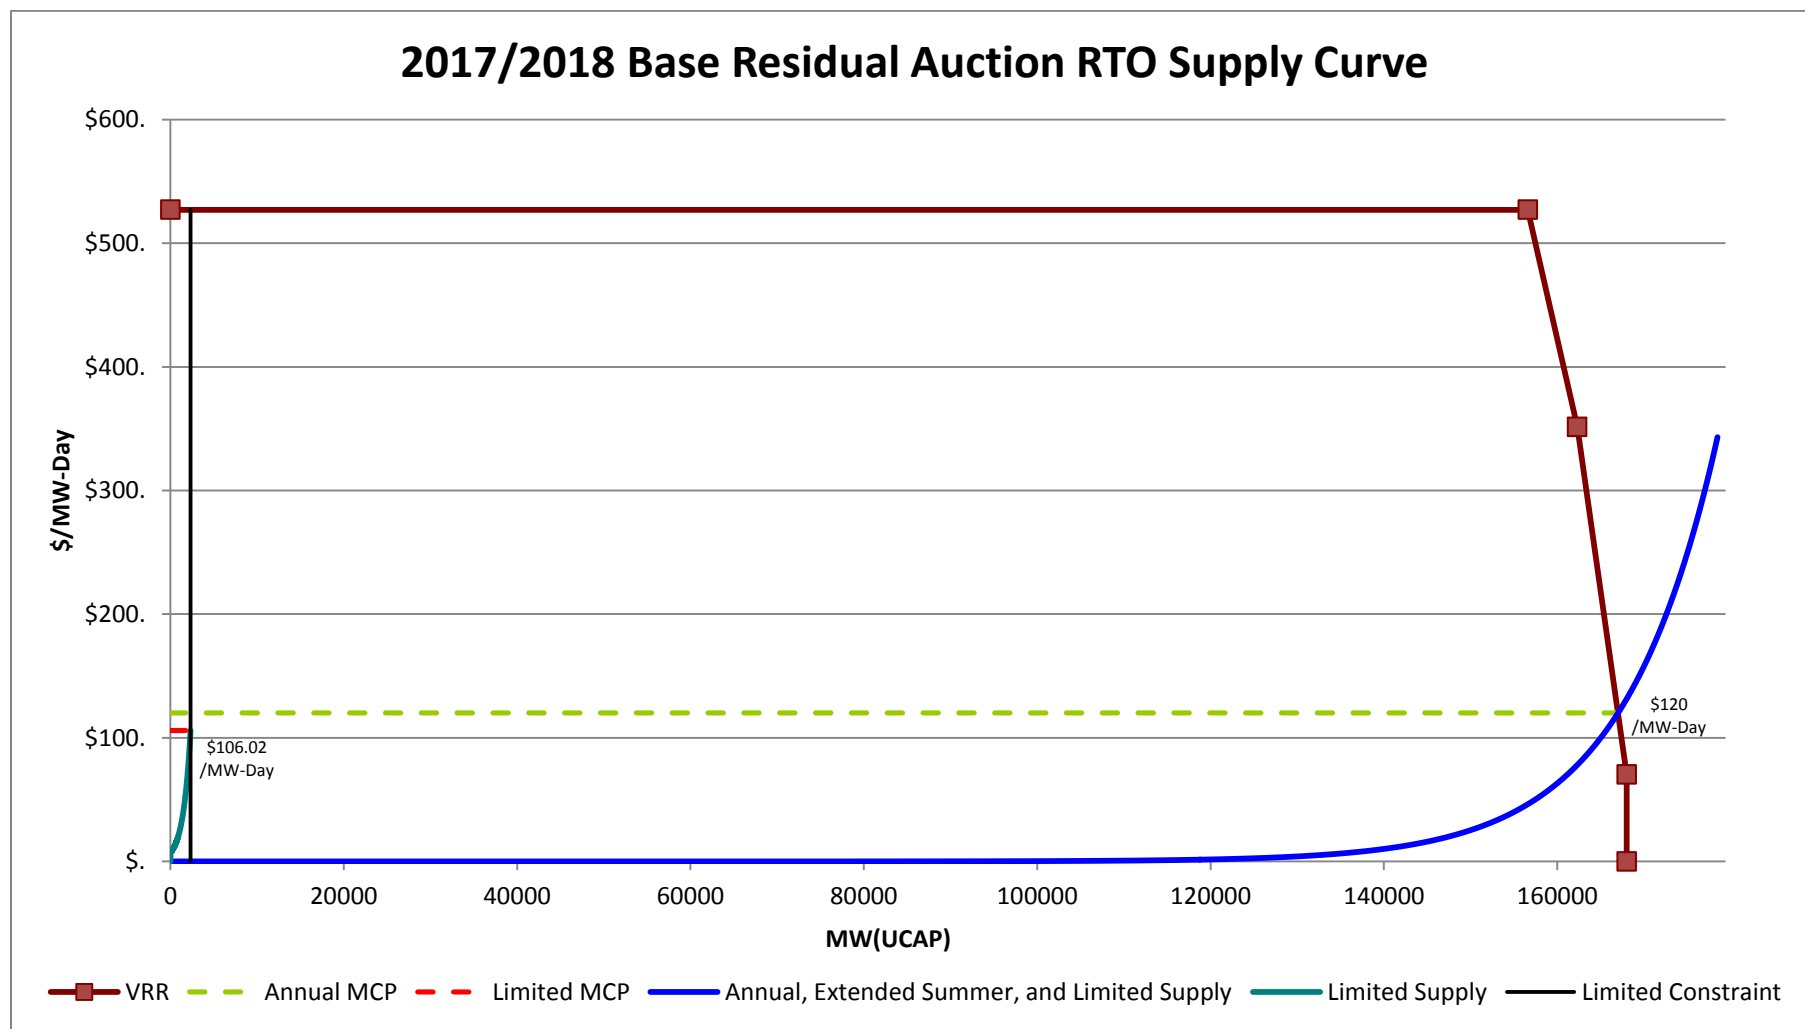

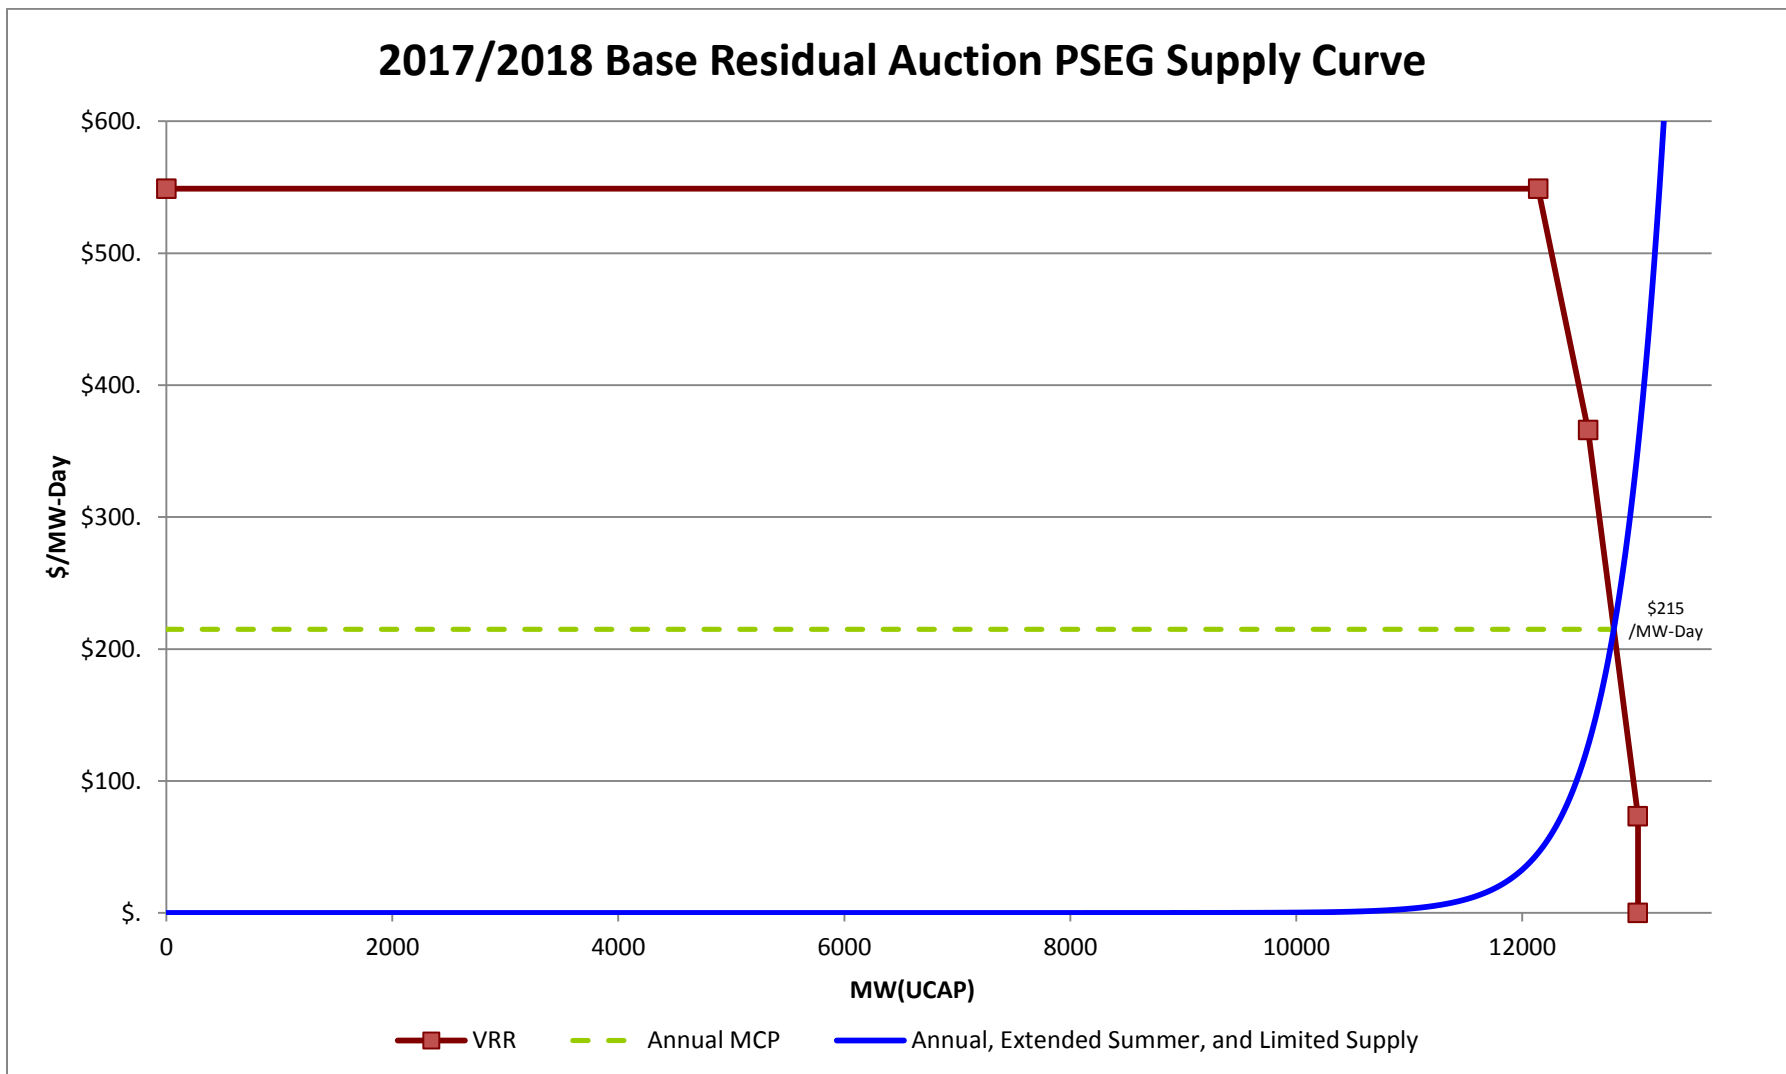

Figure 1:

- RTO supply curve includes sell offers of all product types (Annual, Extended Summer, and Limited DR) in all LDAs
- Sell offers within Constrained LDAs that cleared at a price higher than the RTO resource clearing price were assumed to be zero in graphing the RTO supply curve
- Limited Constraint was binding at the RTO level
- Coupled DR sell offers that did not clear are represented using the sell offer with the lowest offer price within the coupled Demand Resource group

Figure 2:

- Supply curve includes sell offers of all product types (Annual, Extended Summer, and Limited DR)
- Imported MWs are represented with a zero sell offer price
