

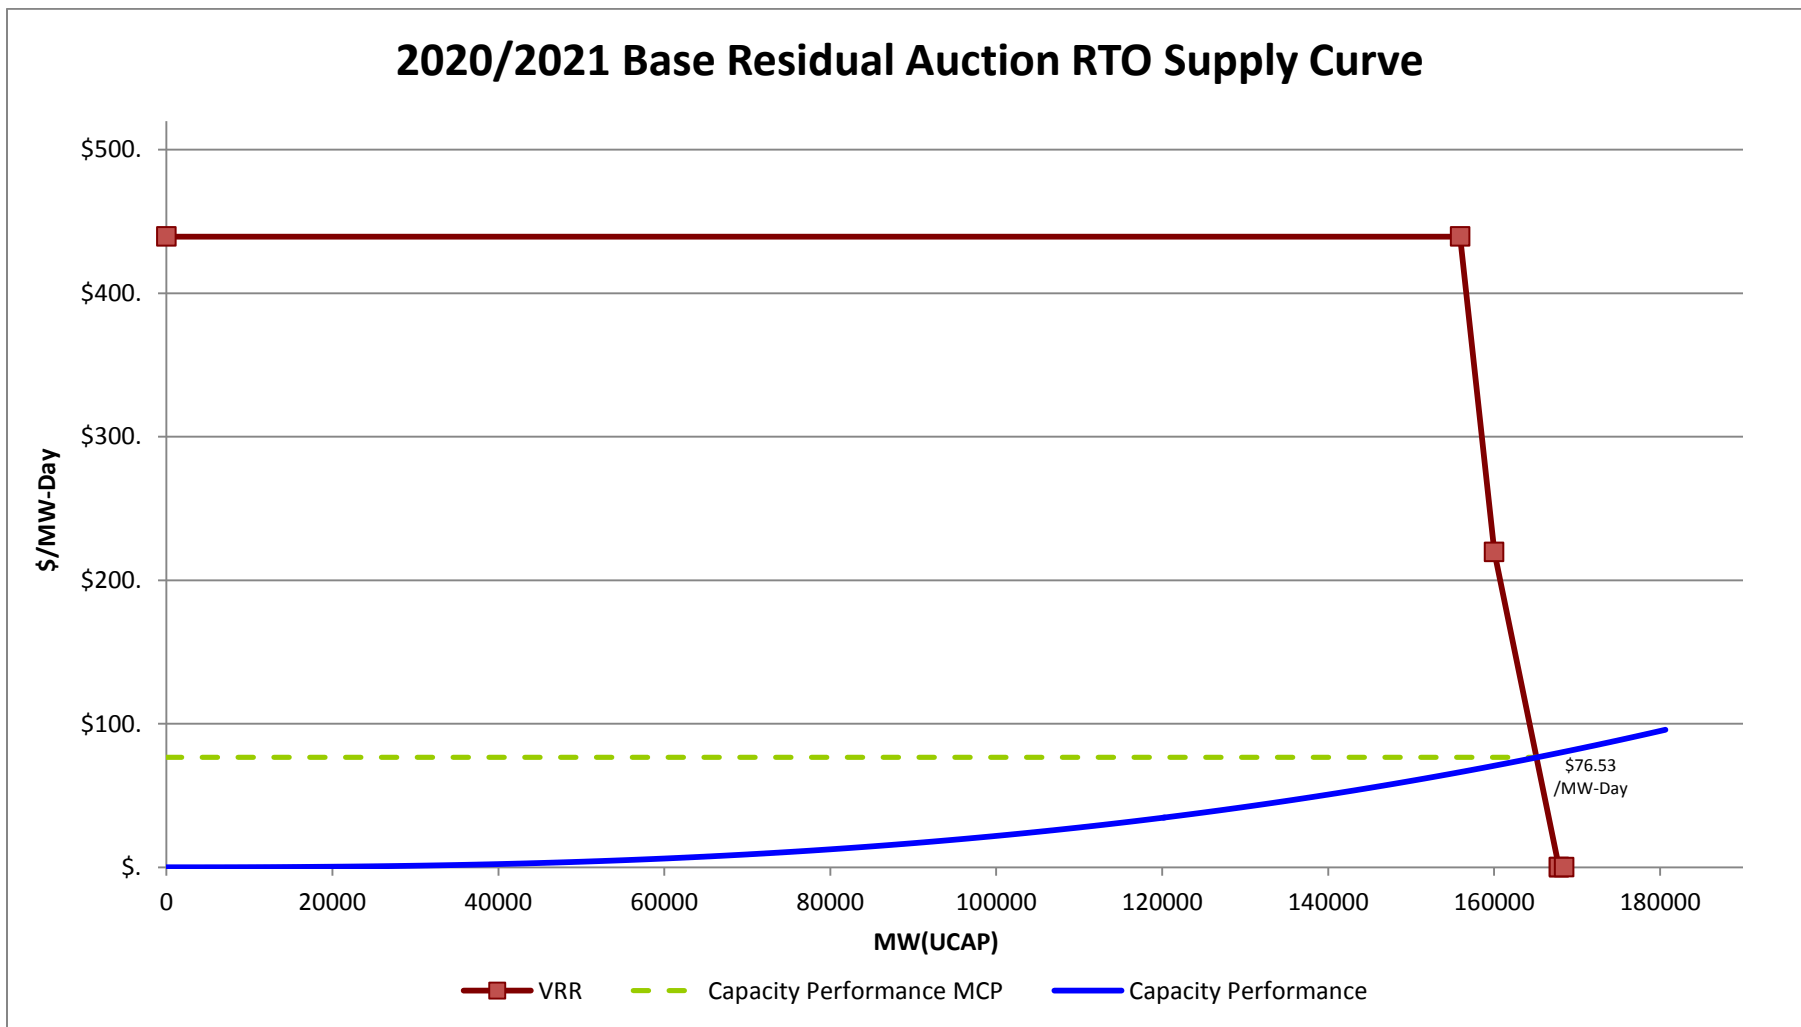

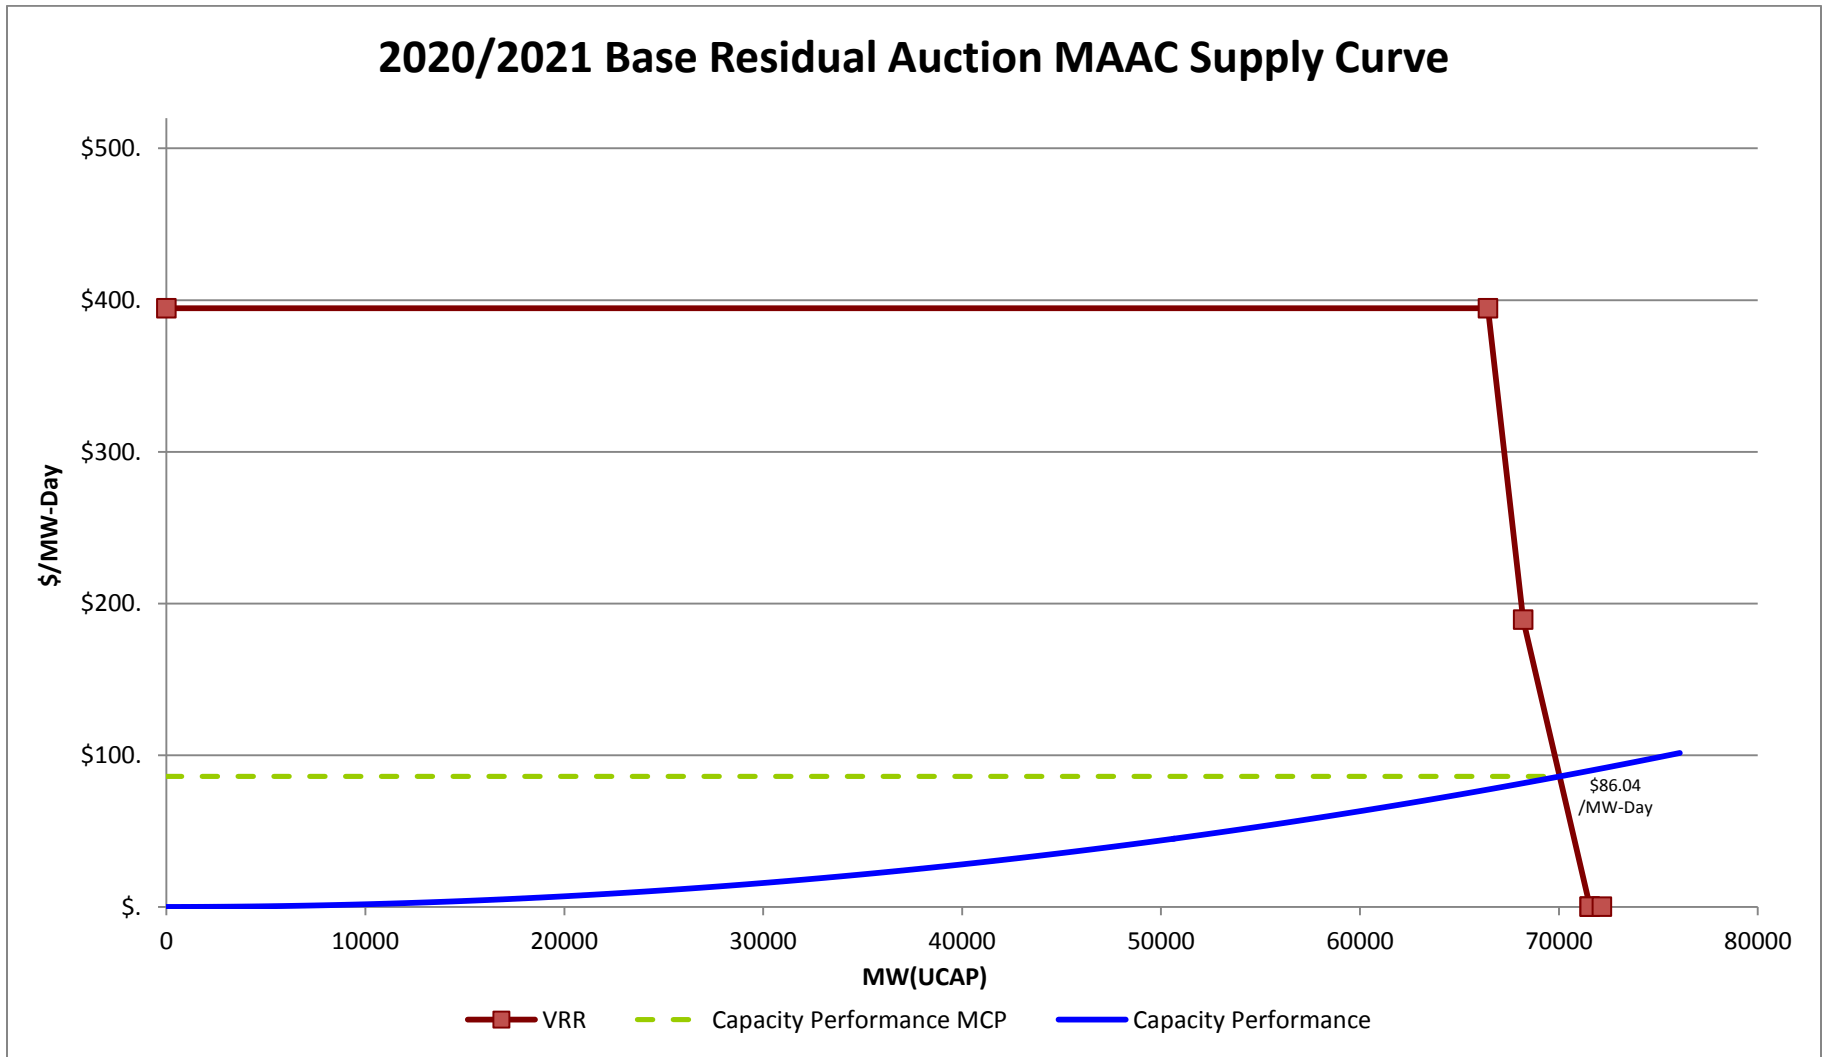

Figure 1:

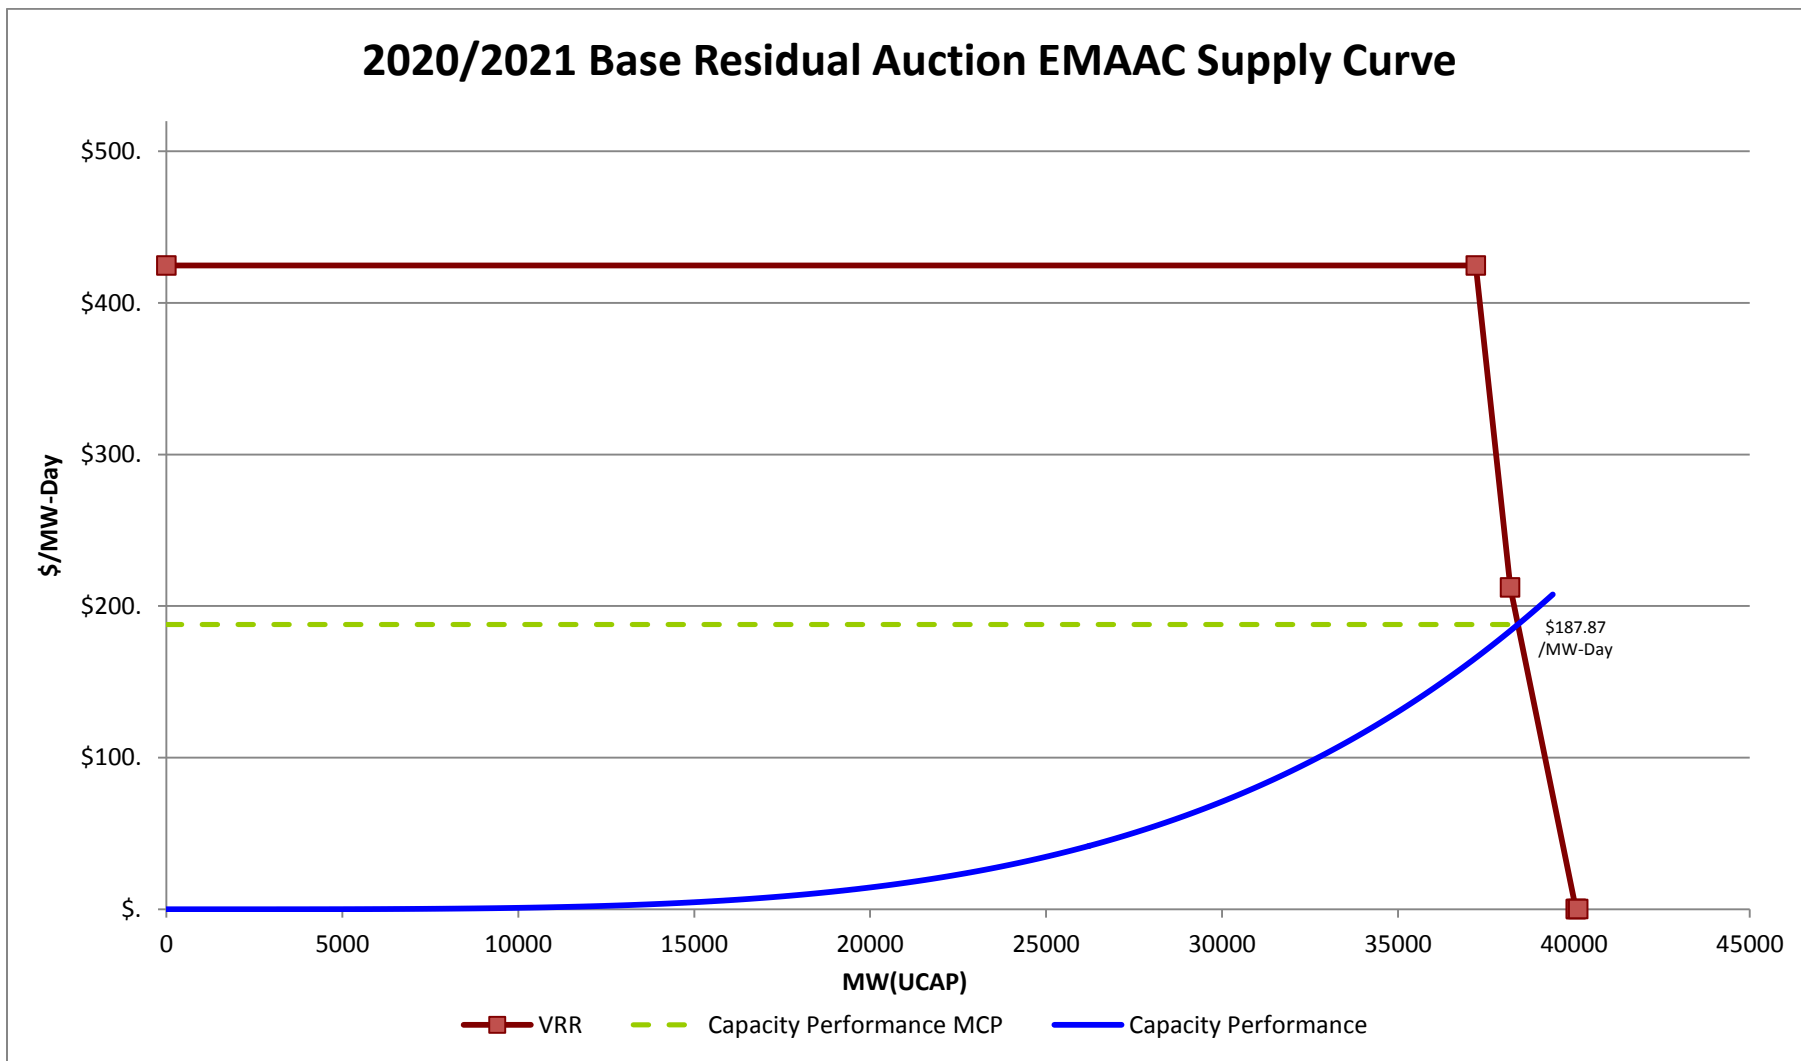

- RTO supply curve includes sell offers from all LDAs
- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Sell offers within Constrained LDAs that cleared at a price higher than the RTO resource clearing price were assumed to be zero in graphing the RTO supply curve

Figure 2:

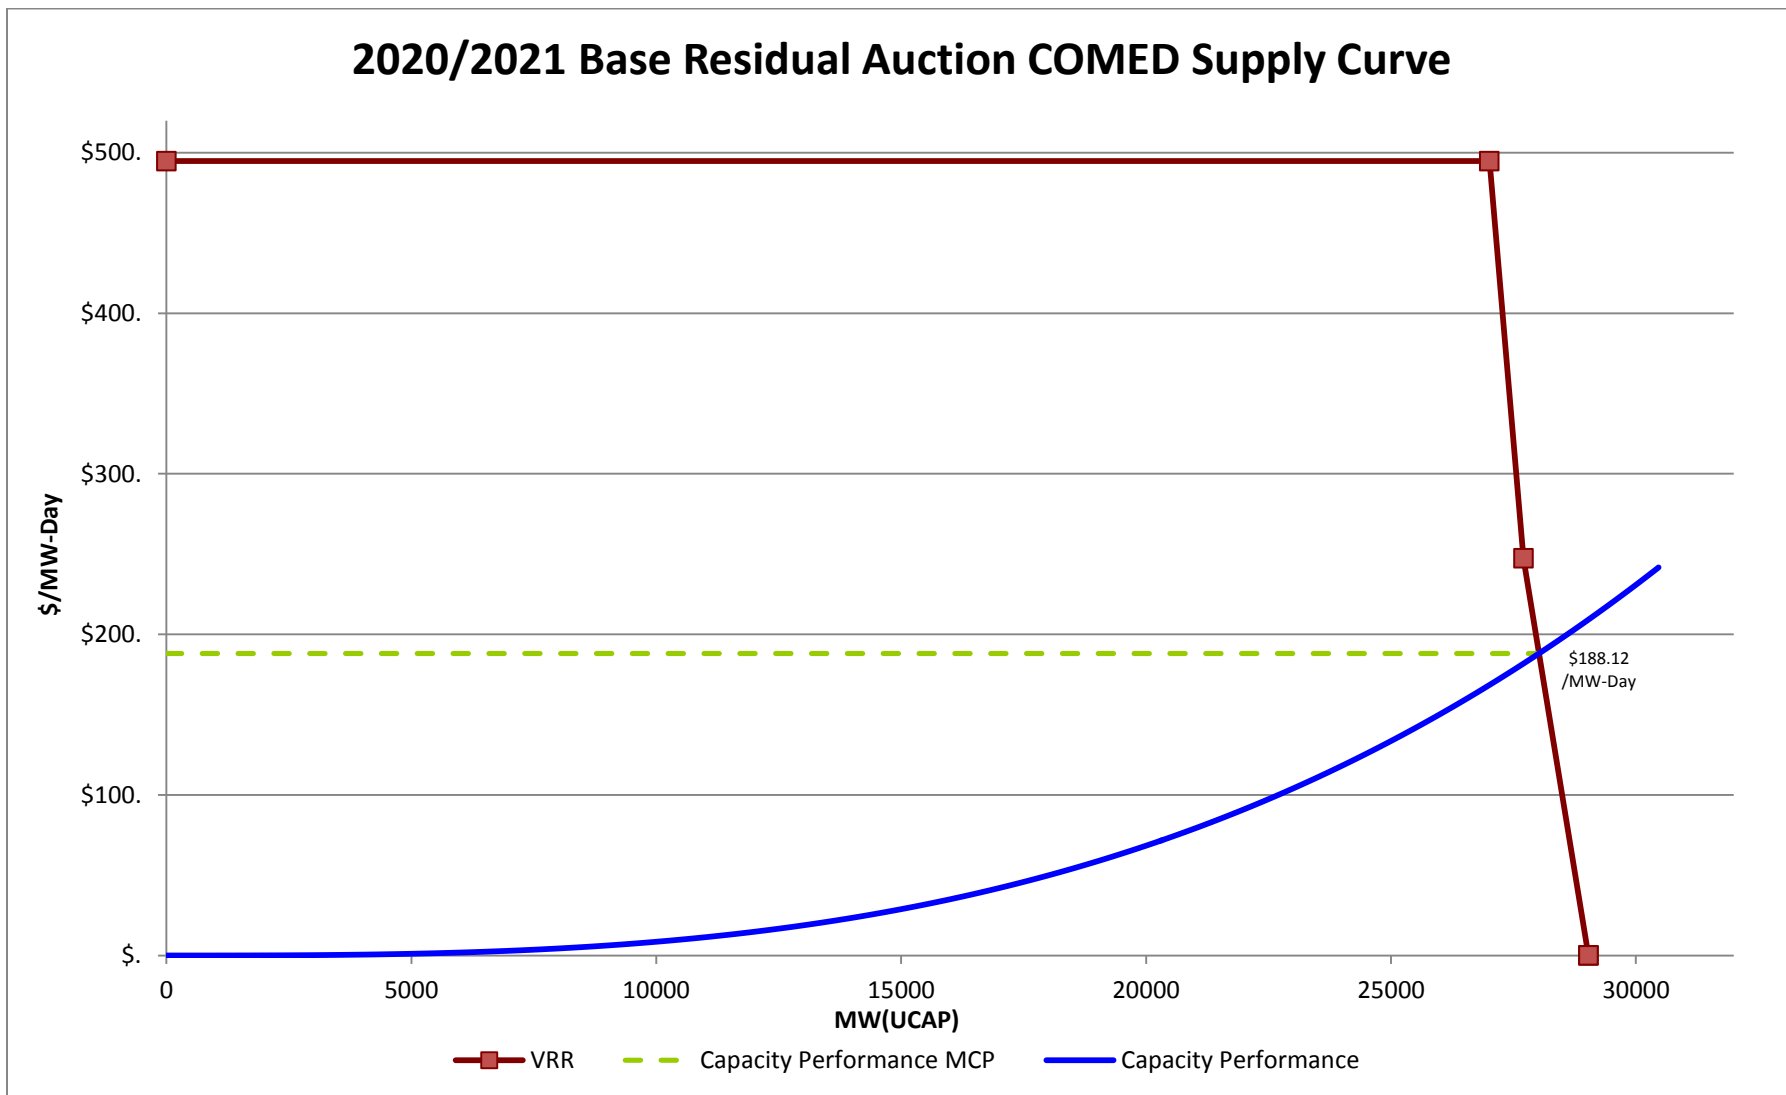

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price

Figure 3:

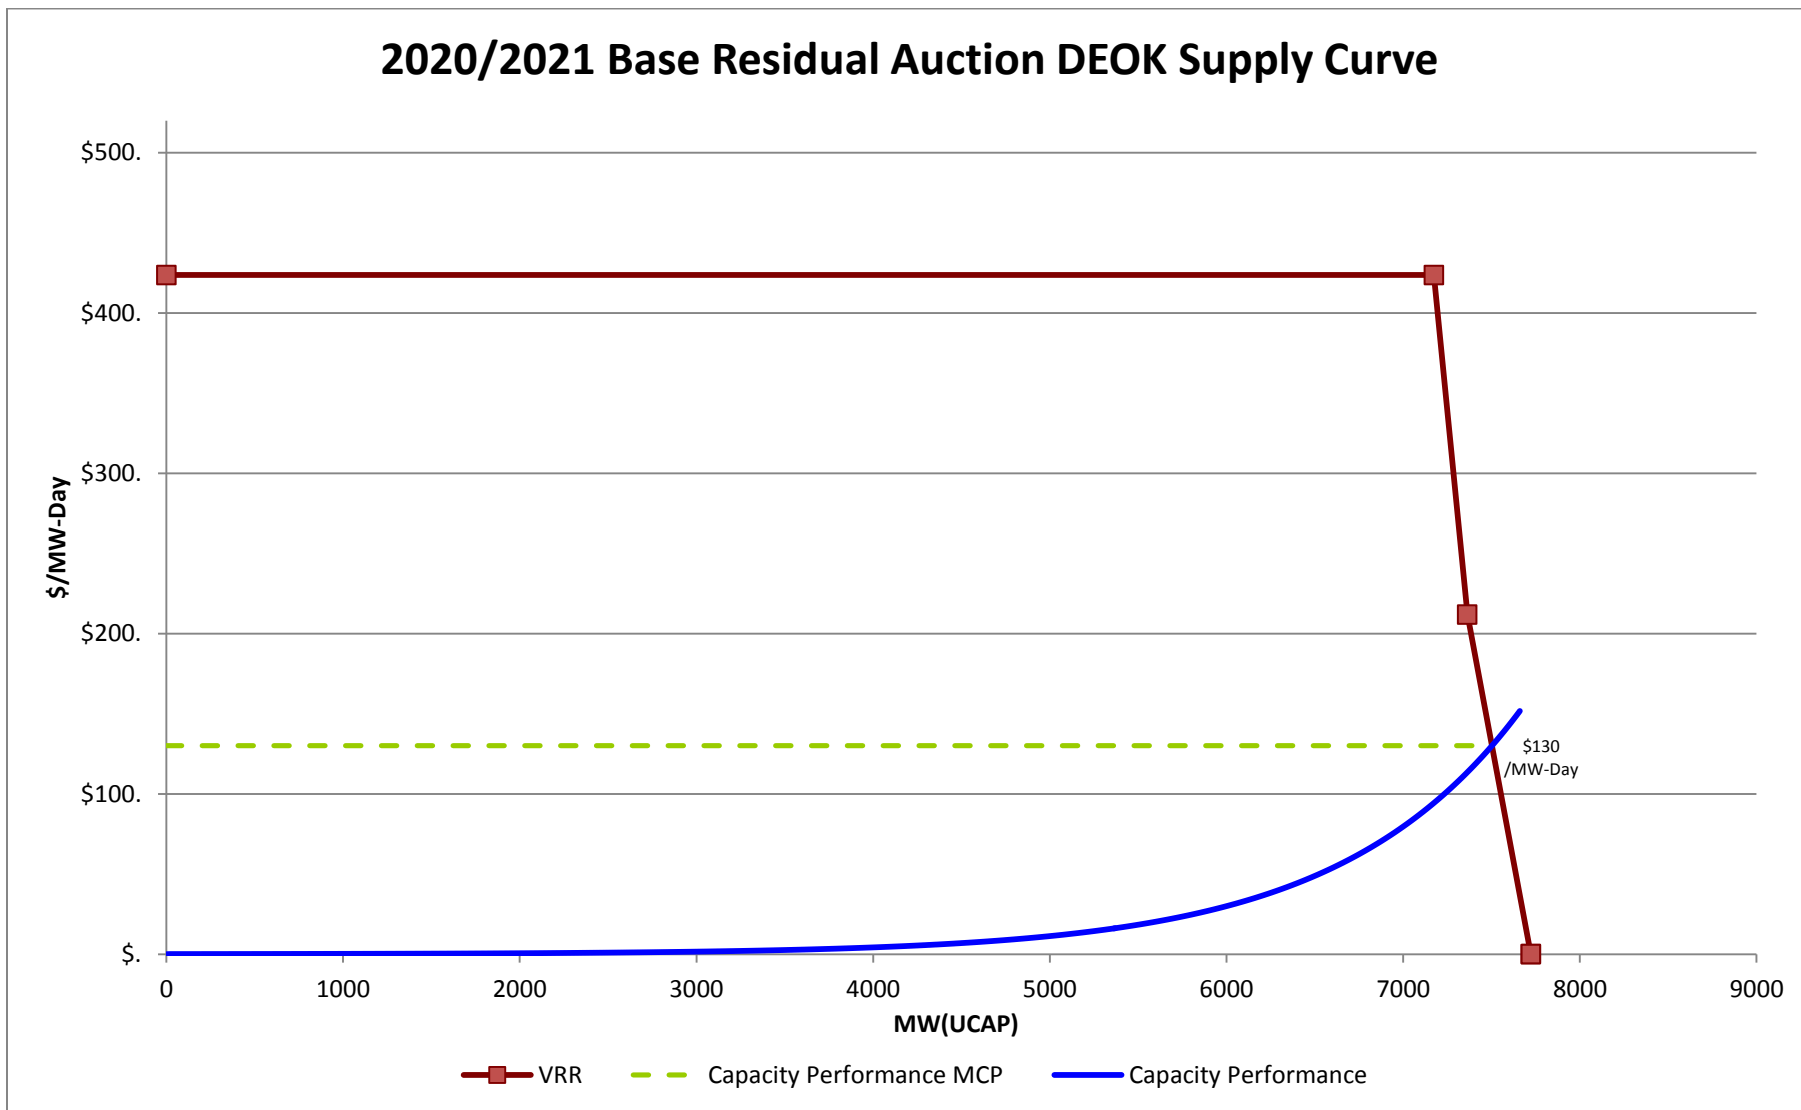

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price

Figure 4:

- Imported MWs are represented with a zero sell offer price

Figure 5:

- Imported MWs are represented with a zero sell offer price
