> Re: Old Dominion Electric Cooperative, Docket No. ER09-1143-000 Informational Filing for 2018 Transmission Formula Rate Update

Dear Secretary Bose:

By unpublished letter order issued September 5, 2007 in Docket No. ER07-1134, the Commission accepted for filing revised tariff sheets to the Open Access Transmission Tariff ("OATT") of PJM Interconnection, L.L.C. ("PJM") establishing a transmission cost-of-service formula rate and implementation protocols for Old Dominion Electric Cooperative ("ODEC"). The formula rate allows ODEC to recover the revenue requirements for certain transmission facilities in PJM.

Section 1.b of ODEC's Formula Rate Implementation Protocols ("Protocols")¹ provides:

- b. On or before May 15 of each year, Old Dominion shall recalculate its Annual Transmission Revenue Requirements, producing the "Annual Update" for the upcoming Rate Year, and:
 - (i) post such Annual Update on PJM's Internet website via link to the Transmission Services page or a similar successor page; and
 - (ii) file such Annual Update with the FERC as an informational filing.

In accordance with Section 1.b(ii) of the Protocols, ODEC hereby submits, for informational purposes, its 2018 Annual Update. ODEC is providing its populated formula rate template and supporting workpapers in native Microsoft Excel format with formulas intact, consistent with Commission Staff's Guidance on Formula Rate Updates. The same information contained herein has been transmitted to PJM for posting on its website as required by the Protocols.

-

¹ Attachment H-3G to the PJM OATT.

Kimberly D. Bose May 15, 2018 Page 2

Through the instant filing and the posting on PJM's website, all interested parties should have notice of and access to ODEC's Annual Update. The Commission has stated that, upon receipt, it "will not act on or notice the informational filing because the formula rate implementation protocols provide specific procedures for notice, review, and challenges to the Annual Updates."²

ODEC's Annual Update meets the requirements of the Protocols. ODEC has made no Material Accounting Changes as that term is used in the Protocols. Further, ODEC's Annual Update contains no expenses or costs that have been alleged or judged in any administrative or judicial proceeding to be illegal, duplicative, or unnecessary costs that are demonstrably the product of discriminatory employment practices, as defined in 18 C.F.R. § 35.13(b)(7).

Thank you for your attention to this matter. Please contact the undersigned if there are any problems with this submission.

Respectfully submitted,

Thompson Coburn LLP

/s/ Adrienne E. Clair

Notes

- A Electric portion only
- B Exclude Construction Work In Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant that is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected to be placed in service in the current calendar year that is not included in the PJM Regional Transmission Plan (RTEP) must be separately detailed on Attachment 5. For the Reconciliation, new transmission plant that was actually placed in service weighted by the number of months it was actually in service.
- C Transmission Portion Only
- D All EPRI Annual Membership Dues
- E All Regulatory Commission Expenses
- F Safety related advertising included in Account 930.1
- G Regulatory Commission Expenses directly related to transmission service, RTO fillings, or transmission siting itemized in Form 1 at 351.h.
- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =
 "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in
 Attachment 5 the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that
 elected to use amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce
 - rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). A utility must not include tax credits as a reduction to rate base and as an amortization against taxable income.
- J ROE is determined initially to be 10.50% and no change will be made absent a filing with the FERC.

 K Education and outreach expenses relating to transmission, for example siting or billing
- L As provided for in Section 34.1 of the PJM OATT and the PJM established billing determinants.
- M Amount of transmission plant excluded from rates per Attachment 5.
- N Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have made lump-sum payments to Old Dominion (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A.

 Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 155.
- O Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M.

 If they are booked to Acct 565, they are included in on line 64
- P Securitization bonds may be included in the capital structure.
- Account 561.4 expenses for Scheduling, System Control and Dispatching Service: Old Dominion elects to exclude recovery of expenses recorded in Account 561.4, without prejudice to recovery of such expenses in future informational filings under its rate formula. Account 562 expenses related to Virginia mainland costs of facilities that ODEC does not own and, thus, would otherwise not be properly excluded from the transmission revenue requirements through the exclusion adjustment.

Criteria for Allocation:				

Criteria for Allocation

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they will not be included.
- B [Intentionally left blank.]
- C Other taxes that are assessed based on labor will be allocated based on the Classified Gross Plant Allocator.
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator.
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

2 Total Rent Revenues

(Sum Lines 1)

Account 456 - Other Electric Revenues (Note 1)

- 3 Schedule 1A
- 4 Net revenues associated with Network Integration Transmission Service (NITS) for which the load is not included in the divisor (difference between NITS credits from PJM and PJM NITS charges paid by Transmission Owner) (Note 4)
- 5 Point to Point Service revenues for which the load is not included in the divisor received by Transmission Owner (Note 4)
- 6 PJM Transitional Revenue Neutrality (Note 1)
- 7 PJM Transitional Market Expansion (Note 1)
- 8 Professional Services (Note 3)
- 9 Revenues from Directly Assigned Transmission Facility Charges (Note 2)
- 10 Rent or Attachment Fees associated with Transmission Facilities (Note 3)
- 11 Gross Revenue Credits

(Sum Lines 2-10)

- 12 Less line 17a
- 13 Total Revenue Credits

Revenue Adjustment to determine Revenue Credit

14

Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 173 of Appendix A.

- 15 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.
- 16 Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 17a 17g, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).
- 17a Revenues included in lines 1-11 which are subject to 50/50 sharing.
- 17b Costs associated with revenues in line 17a
- 17c Net Revenues (17a 17b)
- 17d 50% Share of Net Revenues (17c/2)
- 17e Costs associated with revenues in line 17a that are included in FERC accounts recovered through the formula times the allocator used to functionalize the amounts in the FERC account to the transmission service at issue.
- 17f Net Revenue Credit (17d + 17e)
- 17g Line 17f less line 17a
- Note 4: If the facilities associated with the revenues are not included in the formula, the revenue is shown here but not included in the total above and is explained in the Cost Support; for example revenues associated with distribution facilities. In addition, Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.
- 19 Amount offset in line 4 above
- 20 Total Account 454 and 456
- 21 Note 4: SECA revenues booked in Account 447.

Step Month Year Action

Exec Summary

- 1 April Year 2 TO populates the formula with Year 1 data from FERC Form 1 data for Year 1 (e.g., 2016)
- April Year 2 TO estimates all transmission Cap Adds for Year 2 weighted based on Months expected to be in service in Year 2 (e.g., 2017)
- 3 April Year 2 TO adds weighted Cap Adds to plant in service in Formula
- Year 2 Post results of Step 3 on PJM web site
- 5 June Year 2 Results of Step 3 go into effect for the Rate Year 1 (e.g., June 1, 2017 - May 31, 2018)
- 6 April Year 3 TO populates the formula with Year 2 data from FERC Form 1 for Year 2 (e.g., 2017)
- April Year 3 TO estimates Cap Adds during Year 3 weighted based on Months expected to be in service in Year 3 (e.g., 2018)
- 8 April Year 3 Reconciliation - TO calculates Reconciliation by removing from Year 2 data - the total Cap Adds placed in service in Year 2 and adding weighted average in Year 2 actual Cap Adds in Reconciliation (adjusted to include any Reconciliation amount from prior year)
- 9 April Year 3 Reconciliation TO adds the difference between the Reconciliation in Step 8 and the forecast in Line 5 with interest to the result of Step 7 (this difference is also added to Step 8 in the subsequent year)
- 10 May Year 3 Post results of Step 9 on PJM web site
- 11 June Year 3 Results of Step 9 go into effect for the Rate Year 3 (e.g., June 1, 2018 May 31, 2019)
- 1 April Year 2 TO populates the formula with Year 1 data from FERC Form 1 data for Year 1 (e.g., 2016)
 - \$ 4,752,194 Rev Req based on Year 1 data Must run Appendix A to get this number (without any cap adds in line 21 of Appendix A)
- 2 April Year 2 TO estimates all transmission Cap Adds for Year 2 weighted based on Months expected to be in service in Year 2 (e.g., 2017)

Old Dominion Electric Cooperative Attachment 7 - Transmission Enhancement Charge Worksheet

New Plant Carrying Charge

Fixed Charge Rate (FCR) if not a CIAC Formula Line

A B C	160 167	Net Plant Carrying Charge without Depreciation Net Plant Carrying Charge per 100 Basis Point in ROE without Depreciation Line B less Line A	16.0417% 16.3122% 0.2705%

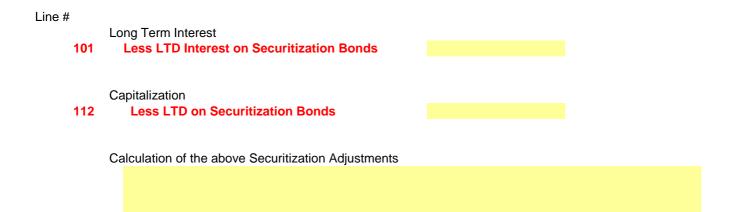

FCR if a CIAC

D 161 Net Plant Carrying Charge without Depreciation, Return, nor Income Taxes 9.3299%

The FCR resulting from Formula in a given year is used for that year only. Therefore actual revenues collected in a year do not change based on cost data for subsequent years
