The Honorable Debbie-Anne A. Reese, Secretary Federal Energy Regulatory Commission 888 First Street, NE Washington, D.C. 20426

> Re: UGI Utilities, Inc., Docket No. ER25-3066-000 Errata to Formula Rate – Depreciation Rate Revision

Dear Secretary Reese:

On August 1, 2025, UGI Utilities, Inc ("UGIU") filed in Docket No. ER25-3066-000 proposed revisions to the transmission depreciation rates contained in its formula transmission rate at Attachment H-8C of the PJM Interconnection, L.L.C. ("PJM") Open Access Transmission Tariff ("OATT").<sup>1</sup>

UGIU recently discovered that the final page of the attachment to that filing, the populated Attachment H-8C (specifically, "Attachment 9 – Depreciation Rates") mistakenly included the redlined rather than the clean version of the revised tariff sheets. To correct this inadvertent error, UGIU is submitting this Errata, which contains a pdf of the full populated template, including a clean version of Attachment 9.

UGIU will also post this Errata on PJM's Internet website via a link to the Transmission Services page or similar successor page, per its Formula Rate Implementation Protocols.

Please contact the undersigned if you have any questions.

<sup>&</sup>lt;sup>1</sup> Pursuant to Order No. 714, the subject filing was submitted by PJM on behalf of UGIU as part of an XML filing package that conforms with the Commission's regulations. PJM has agreed to make all tariff filings on behalf of the PJM Transmission Owners in order to retain administrative control over the PJM OATT. Thus, UGIU had requested PJM to submit this filing in the eTariff system as part of PJM's electronic Intra PJM OATT.

## Respectfully submitted,

/s/ Richard Bonnifield

Richard Bonnifield Husch Blackwell LLP 1801 Pennsylvania Avenue, NW, Suite 1000 Washington, D.C. 20006-3606 (202) 378-5390 richard.bonnifield@huschblackwell.com

Counsel to UGI Utilities, Inc.

#### Notes

- A Electric portion only
- B Exclude Construction Work In Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant included in the PJM Regional

  Transmission Expansion Plan which is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service.

  For the true-up, new transmission plant which was included in the PJM RTEP actually placed in service weighted by the number of months it was actually in service
- C Transmission Portion Only
- D EPRI Annual Membership Dues
- E All Regulatory Commission Expenses
- F Safety related advertising included in Account 930.1
- G Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized at 351.h.
- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =

  "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a

  work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that
  elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce
  rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f)
  multiplied by (1/1-T). A utility must not include tax credits as a reduction to rate base and as an amortization against taxable income.
- J ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.
- K Education and outreach expenses relating to transmission, for example siting or billing
- L The Network Zonal Rate is calculated by PJM Interconnection for the PPL Group Zone.
- M Amount of transmission plant excluded from rates, includes investment in generation step-up transformers to the extent included in Plant in Service.
- N Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have made lump-sum payments (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A.

  Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 154.
- O Payments made under Schedule 12 of the PJM OATT are excluded in Transmission O&M on line 64 since they are already assessed under Schedule 12
- P Securitization bonds may be included in the capital structure.

## Attachment 3 - Revenue Credit Workpaper

	Account 454 - Rent from Electric Property		
1	Rent from Electric Property - Transmission Related (Note 3)		
2	Total Rent Revenues	(Line 1)	
2	Total Nett Nevertues	(Line 1)	-
	Account 456 - Other Electric Revenues (Note 1)		
3 4	Schedule 1A		
	Net revenues associated with Network Integration Transmission Service (NITS) for which the load is not included in the divisor (difference between NITS credits from PJM and PJM NITS charges paid by Transmission Owner) (Note 4)		
5	Point to Point Service revenues received by the Transmission Owner for which the load is not included in the divisor		
6	PJM Transitional Revenue Neutrality (Note 1)		
7	PJM Transitional Market Expansion (Note 1)		
8	Professional Services (Note 3)		
9	Revenues from Directly Assigned Transmission Facility Charges (Note 2)		
10	Rent or Attachment Fees associated with Transmission Facilities (Note 3)		
11	Gross Revenue Credits	(Sum Lines 2 through 10)	-
12	Line 17g		-
13	Total Revenue Credits	(Line 11 - Line 12)	-
14	Revenue Adjustment to determine Revenue Credit  Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or the associated load will be included in the peak on line 173 of Appendix A.		
15	Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.		
16	Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 17a - 17g, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).		
17a	Revenues included in lines 1-11 which are subject to 50/50 sharing.		
17b	Costs associated with revenues in line 17a		
17c	Net Revenues (17a - 17b)		
17d	50% Share of Net Revenues (17c / 2)		
17e	Costs associated with revenues in line 17a that are included in FERC accounts recovered through the formula times the allocator used to functionalize the amounts in the FERC account to the transmission service at issue.		
17f	Net Revenue Credit (17d + 17e)		
17g	Line 17f less line 17a		-
18	Note 4: If the facilities associated with the revenues are not included in the formula, the revenue is shown here but not included in the total above and is explained in the Cost Support; for example, revenues associated with distribution facilities. In addition, Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.		
19	Amount offset in line 4 above		
20	Total Account 454 and 456	(Lines 11+ 18 + 19)	-

### 397.2C Notes:

- 1) Columns (A), (B), (C), and (D) are fixed and cannot be changed absent Commission approval or acceptance.
- Column (E) is the average remaining life of the assets in the account based on their vintage. 2)
- 3) The mortality curve listed for account 390.1 is a truncated / interim survivor curve.

- Column (F) is the depreciation rate from the Mortality Curve specified based on data in Columns (C) and (D). 4)
- 5) Columns (G) and (H) are the depreciable gross plant investment and accumulated depreciation in the account or subaccount.
- 6) Column (I) is the depreciable balance (future accruals) in the account or subaccount.
- 7) Column (J) is column (F) multiplied by column (G) for those accounts that have an identified Mortality Curve.
- 8) At least every 5 years, UGI Electric will file with the Commission a depreciation study supporting its existing Estimated Life and Mortality Curve for each account or subaccount.

9) For those General Plant accounts that do not have Mortality Curves as indicated by "SQ" in Column (D), the calculation of Depreciation Expense is by the Gross Plant Method (i.e., Column (F) multiplied by Column (G))
